[00:00:19] But it's already paper pens that cross the line. The choice in favor of game phenomena was taken andrei mentality. Simferopol December 05 new region krym anna yakut sure that war and peace in reality go massively and duties on imports from canada will help and to harm and hide from Lvivians he wrote. He's already written a statement to the police.

[00:01:29] It should. We have.

[00:01:35] have a friend. And even nicolas sarkozy in the spring.

[00:01:57] This awful nothing at all about the possible intention of george bush.

[00:02:26] Ukraine the aggressor has said it agrees to release civilians from south towards Shirokino a humanitarian corridor from Kharkov towards the recovery area of Subbotin and from Kiev towards Vasilky that is these three corridors of three liberated cities that the Russian demand. For some reason, I quote us the phrase Russian aggressors because the Verkhovna Rada was in session. The plenary session lasted 15 minutes and within 15 minutes they voted for 15 decisions, including the law on cooperation, which was adopted before the sanctions from Russia not only on February 4, 22, but also on February 14. The date is not mentioned exactly, it is the first time of the 14th year of the Russian aggression. But judging by the statements of our politicians they also do not recognize Russian aggression on May 14 and they do not recognize Russian aggression on May 14 because they talk about Russian aggression, which began literally five days ago. And what is frightening is that Russia did not attack then. So it's like that. And in general the meeting of the Verkhovna Rada is very surprising. Why because I went on the website of the Verkhovna Rada and I wanted to know the names of those 50 deputies on the list. People gathered at the plenary session to see these names to look at these courageous faces. But I discovered that there is no voting record by name. Reportedly 283,287,288 supported the decision with anywhere from 15 to 24 deputies who demanded meetings.

[00:04:04] However the names of the courageous deputies voted I did not recognize. What's more, there's no video of the walkout anymore. The session went on into the night. At about 13:30 it ended at 13:50 Kiev time. That there is still no video recording. All right, I understand that it was impossible to broadcast it live because the supreme legislative body suddenly the enemy aggressor will strike, which Nadiya Savchenko wanted to do. Of course the supreme legislative body is our supreme authority. After that, it was necessary to set an example of courage. I have doubts whether this meeting took place. Let it be my doubts the official sources that we should believe say that this meeting and there was a favorite humanitarian corridor from the side agreed that there would be a humanitarian corridor. Moreover agreed on communications related to humanitarian missions. In particular the declaration of silence so that people could leave in peace but instead of a humanitarian corridor as you understand. I did not get it in my head because Vladimir Zelinsky made a statement on the eve of these negotiations on the same day in which he outlined his understanding of a humanitarian corridor. A

humanitarian corridor is when food and medicines are being brought into a town, and as you know women and children. In the understanding of the Russian aggressor. A. I think we should have gone back to

[00:06:06] What they were talking about a long time ago, it became clear that the

[00:06:20] The Russians have something

[00:06:22] That kind of thing. In terms of the attitude I've already said. In the city.

[00:07:05] There were speculators and one of them was Russian

[00:07:20] A music producer. I didn't want light either 35 the gas pipe was blocked. Artem the interlocutor of the TV channel to the shelling the night before the outskirts of Makeyevka yesterday Gvardeyskiy district. And oh oh oh oh oh oh oh oh oh oh oh oh oh. I'm glad for putin in the duma it will be more fun in terms of doing putin's business on the territory of ukraine. Well for example my daughter lukoil i will call it in some way lubyanka restaurant can be found and this is how much blood has already replenished the scum. Yes yes yes yes yes at least fucking contribute and change. The heads of the center boris kostin all welcome. Hanging four center signs to all. Facial features to all. Four centers boris kostin reception. Militia escort goes to the buffer zone on the positions of Ukrainian security forces.

[00:11:28] Very quickly the convoy gets to the front line this village in the north of the Luhansk region is now a neutral zone it by. So, evgeny poddubny, our war correspondent who is joining us now joins us directly from the war zone. Evgeny, what is the situation on the frontlines right now, what can you tell us? Yes Dmitriy hello but all the research team has been working for 24 hours on the southern section of the front where units of the Donetsk people's republic are advancing together with the armed forces of the Ministry of Defense of the Russian Federation continue the forces of Donetsk to develop success. Today a number of large settlements have been liberated from the formations that are still subdued. We can say that the cauldron of encirclement around the large seaside city of Mariupol has in fact already been formed. At the moment, battles are taking place along the Mariupol-Donetsk highway, and Volnovakha is already fully encircled. By the way, civilians from Volnovakha are telling us that the militants are not letting us out of the city, not letting us evacuate, and are actually using people as human shields. By the way artillery of the Donetsk people's republic works jeweler it does not hit the settlements that's why maybe not so fast moving forward.

[00:13:05] Today we made sure our camera crew made sure you were liberated.

[00:13:10] A number of settlements have been liberated first of all this is the village of granitnoe from where the formations that are subordinate to this units of the armed forces of Ukraine and the militants of the bat were hitting on the highway that from Novoazovsk Donetsk threatened civilians simonov large settlements of the Azov Sea. Today it also became known that smaller populated areas had been liberated, but by evening it was reported that the fighters of the

Donetsk People's Republic had succeeded in recapturing the village of Shirokino from the Ukrainian Marine Corps Brigade, which had been contrary to the Minsk Agreements for several years before. In fact, now the DPR armed forces are in the immediate vicinity of Mariupol, and every day we see the picture of soldiers of the armed forces of the Donetsk people's republic returning home after 8 years of war. There was such a picture today as well.

[00:15:24] Live.

[00:15:25] Talking about the main thing. Anastasia Narva is in the news studio. Hello. A new victim of shelling this afternoon one of the Ukrainian shells exploded in Yasinovataya on Sadovaya street killed a woman reported in the Defense Headquarters of the DPR. Four civilians, including two children aged 10 and 17 were wounded today during shelling of Gorlovka in the target area of Ukrainian weapons was Korolenko Street. All the victims have already been given all the medical care they need and their condition is assessed as satisfactory. This morning, 40 missiles from BM-21 Grad and up to three dozen 122-calibre mines were fired at Horlivka. In particular, various damages to residential houses were recorded in the village of Shumy Gorlovka Panteleimon Komarova mine named after Gagarin Lenin power lines were built gas lines. Two 15-year-olds were wounded by mortar fire in the Luhansk people's republic on the road Golubovsky Kirovsk. One of the victims has already been discharged from the hospital, the second child was operated on all night long, according to the LNR mission. He is now in intensive care in serious condition with

[00:16:41] Open cranial trauma skull fracture of limbs multiple soft tissue contusions of the shoulder. Right continues activities ventilator guys because she's in a coma state.

[00:17:00] Probably a resident was injured this afternoon during the shelling of the Kiev district of Donetsk in the street opened fire in the areas of the settlements of oktyabrsky north administrative. This morning, a residential building on Vozleznaya Street was damaged A direct hit to a house was recorded in Kirovsky district on Shuman Street. In Donetsk today said goodbye to an employee of Donbass gas, who died in the performance of his professional duties on February 28 during the shelling of the Kiev district of the capital.

[00:17:38] The deceased Alexander was only 30. He had been working at Donbass gas since 2011. His colleagues say he was a responsible employee and a master of his craft. He was a conscientious and very competent specialist, who led a shift team that was constantly going out to localize emergencies, as well as to such successes. He led the brigade during the shelling and was constantly on the front line. On February 28, Alexander's brigade went to the street during an attempt to eliminate the consequences of shelling and came under fire. Colleagues of the deceased said he saved their lives by covering himself from a shell burst. I was with them on this application. Now it turns out we were burying our comrade, our foreman, San Sanich, as we respectfully called him, he had set the blow on himself just with himself our he saved your lives. And I even took the blow for my father here. The man was gone. There was an explosion and he was gone. Throughout the war, Sasha worked as my foreman. In eastern Lugansk, the bandit formations suffered defeat after defeat, but the local population was killed and his

cronies, my brother told me, would have envied Goebbels himself. Even in my retirement there are dozens of times more of them. The ravens would have ruled the fate just five years ago in Russia. If we characterize the operation as a whole, it is going very well. About the plan of realization of this operation will probably be the meaning of the whole operation the similar measure will ever be carried out and it will be a subject of studying in other academies of the world of all planet it is quite clear. To register I want to show that thousand two thousand years this summer the United States of America carried out the similar operation against Iraq Increased Freedom and the Russian army in number was the same approximately 370 thousand people. It was only after 12 years of sanctions that it was severely weakened.

[00:20:18] So the Americans those tasks that we solved now in because they solved for two weeks. And that's in the desert terrain where the peoples and prepared war plans for you couldn't get their hands on what they were doing. The armed forces of Ukraine as an organized structure ceased to exist on the second third day of this operation. Resistance is provided by individual factions according to a single plan and plan. The most powerful grouping, comprising several dozen men and more than half a dozen brigades with a total strength of about 150 thousand people, was surrounded by our children in the difficult Donbas and Luhansk and home to the reinforcement of their army. Most likely the command to want to excuse their teacher. For comparison, to make it clear that the army of Paulus the sixth army numbered 330 thousand men. So it is the same order of magnitude. That is why we bombed Paulus's army for three months. Then now we decide the question of saving this grouping. That is within a few days. And I draw attention to the fact that now this grouping is already Russian and the Donetsk and Luhansk people's corps has already entered the operational space. Of course we need to raise the question of its elimination, but the centers that are now occupied. Just exactly my favorite way in the former Russians. The reserves that I have have not yet and have not put into action they stand. Moreover, even the replenishment of active army units is not being carried out yet, they do not need it. Casualties are at the level of medics, and what does medics mean? Well, it means that the losses lie within the range of about one-tenth of one percent¹ of such losses. So it's that sanitary loss is that the person who made the car got hit by the truck he had something fall on him.

[00:22:47] That's the kind of disease that's the kind of sanitation loss we had one such serious loss was a huge sabotage reconnaissance rear support group convoy. Her picture was laid out by them that's all. There was nothing else of this kind, it was just not provided cover for the column small by the way the column by fate of these mistakes did not repeat. No it is a big psychological will be the reduction of terms that because mainly in the periods of the Russian pocket can. In Russia everything goes according to plan and the losses are even close Ukrainians write 10 thousand but they do not even understand these 10 thousand losses how many thousands of hundreds should be wounded. But there in the head was one to three that is it to the metro three earlier. That is 10 thousand against 30 thousand wounded now all should be packed to the brim. This propaganda went even further, they said that Russia is no longer because it is fed up and therefore any chance for the Russian Black Sea Fleet to take away when the former deputy chairman of the Moscow City Court of Serpukhov when this question while still our Russian army can by law elected by the Ukrainian people what and who now fights if our

army conscripts absolutely no. Andreev which I said back in the moment of the conscripts. I want to remind you that our armed forces are somewhere around 70 percent contract servicemen and our units improperly mobilized our units we were conducting mobilization deployment most of our friends continue training. And one of our brigades on the ground has become famous for the position relies on complaints that we are directly in Volnovakha here is the building behind my back served as a location militarily speaking and easier to locate

[00:25:50] For one of the platoons of us brother. Donbass this nationalist battalion was transferred here relatively recently just a few days ago to help in the defense of the city. Well, of course the Sparta battalion and the cellular brigade of the people's militia of the DnR could not stop the guys went to the outskirts of the city and engaged in combat with the Donbass platoon, actually in full force, several dozen people up to 30 here in this fight died directly nationalist boys who served in this actually terrorist unit that in quotes became famous naturally in a negative sense. Here since as early as '14 with their victims and terrorizing the local population

[00:26:45] Mariupol was attacked in the same way along with our language and now there are who will be evaluating within a month from the dnr is being shelled. The second side is the dnr army which moved from the side of novoazovsk. Also the regular Russian army approached from the western direction and the north-western direction. Now what is happening in Mariupol. Because there they are blatantly covering the civilian population as a human shield, practically no one is released, and those who are released but there it is even more dangerous who are probably just trying to leave now. People are in basements without any life support measures, i.e. nothing is being done inside. We must also understand that the enemy occupation troops of the Russian Federation have done everything to close the exit of civilians of the million-strong city of Mariupol liberated from the actions of the Russian army founding battalions. In Odessa, where Ukrainian nationalist units are stationed in residential areas civilians can safely leave the settlement through a specially designated office. No obstacles for civilians to leave in this direction Russian servicemen are behind my back. The command and staff vehicle BMP 1 of the Ukrainian army which was destroyed in Volnovakha is now in Volnovakha. In front of me is a truck that was dropping off bk both and judging by the ministers that were now in the yard of an apartment building. Only this was placed in the residential area among the residential buildings in the city that is under cover of civilians. This is exactly what they accuse the Donetsk people's republic of what they accused Russia of. And so when we went on the offensive you can see how they treated the civilians themselves what they did how they deployed the troops how they used the buildings and people as shields even today the Ukrainian National Guard Regiment Azov Marine Regiment has thrown in today the leader of the mechanized brigade is fighting to defend the ideals and the success of victory

[00:29:19] At any cost, I stated.

[00:29:25] I immediately

[00:29:28] I want to say that despite

[00:29:35] Discontent

[00:29:36] August 1841 you believe. The Russian government's first option is to partition Ukraine. He was wrong and the people will live in it again.

[00:29:59] But still let's be grateful to Russia sure expert UKRO fascists just don't stand a chance in the first place well understood clowns. Here's another video message from Candy Girl a significant part of our territory is occupied by Russian occupiers. That means the enemy in the occupied territories. People's resistance. When will we see the Russian navy already and when will we see the famous Marines in action.

websdr_recording_2022-03-04T00_45_26Z_3625.0kHz.wav

[00:00:00] True already and there was an American development center we started it. Here worked the Ukrainian fleet already does not exist such there 16 boats tried to attack a group of ships it no more than 6 boats destroyed the rest eliminated without causing the slightest loss to our ships. The Ukrainians themselves sank their flagship Hetman Sagaidachny Hetman Sagaidachny is the second ship of the Frontier Guard project, which was designed for the USSR frontier forces. They took it not as an anti-submarine ship no unpopular also no big ship the only one in the Ukrainian city to attack the guerrillas supply convoys much easier they are worse. They did not plan there some resistance research techniques that have no combat experience as it shows this examples are already taken. In my opinion if we go to the borders of the western border of Ukraine the goal is very simple now to occupy the entire territory of Ukraine to go to the western border and chase all this junta the fourth and then people systematic mopping up of cities, this task for us will not so much the army as the police and local Ukrainian. But I do not think that this is more likely even given our approach the position of the negotiators. Because it is possible to shoot about once, as it were. Once again, the Soviet experience can block the dismantling of enemy settlements as you want. Now we need to hold rallies with Ukrainian flags to attract the attention of journalists where the famous tractors that Ukrainians were so called to. But I was still constantly telling everyone all these barricades are very. And even in Nagorno-Karabakh. There too the police was bloated, it did not correspond at all to their real efficiency. Moreover, I want to remind you that by the end of the first day of the war, the drones there, including at the airport, stopped working in the ministry and the pilots destroyed three planes at once and destroyed all the couples that are now long gone and all the means were exchanging experience.

[00:02:40] We're starting to totally believe that you could say how the Dzhemilev tenders Mau showed themselves in real combat these Ukrainians had colossal expectations on them too. They have shown themselves very well now they are all being studied by our institute because the ship has been captured and destroyed very much what have been done with. All total resistance and we are ahead of schedule. I have already forgotten why because we had other dates in our plans, taking into account the fact that we were aware of what we would be facing. How do I tell you the timing remind me of the notorious but such fortifications we had set up, but we say so not that there is artillery, that is there are not helped by missiles, and helicopters and

helps. It's straightforwardly very serious. It was not easy to crack the defenses, but the guys coped with the total resistance. This is our trump card in Ukraine. We can say with full confidence that in due course the remnants of Ukrainian band formations were completely annihilated. But it is necessary to do everything possible to make sure that Libya does not escape a deserved trial. But so far I do not decisively and categorically declare that I did not know about the activities of Himmler's accomplices and departments that were subordinate to him. Today after the defeat of the empire I see that I was deceived it was not at all in prison on the night of November 16, 1946. Indeed. 5 6 7. All the guys are waiting for yuliana nikolay nikolayevich boris nikolayevich. The famous reception. So invite zyuganov nikolai ii nikolai ii maria anna 80 yuliana nikolai and seventh nikolai.

[00:07:50] Total nonsense. Yes again and again. Maria Sharapova already. In my opinion but not loudly understand 5 7 5 8 5 7 5 8 valery with his key in his pocket at my sea but I am at the sea center. Once again, tell me raise the circulation of the young at the reception. At the reception. And to all Igor kholba 2 galina borisovna and himself Igor koroleva 2 galya borya and to all Igor koroleva 2 georgiy borisovich Igor koroleva 2 galya borya at the reception Artem Igor kholba 2 galina borisovna and himself Igor koroleva 2 galya borya. And to all Igor who luba 2 george boris igor luba 2 galya borya at the reception. S. Artem Igor 2 Galina Boris Artem Igor Korolev 2 Galia Borya Artem Igor. Lyuba 2 georgiy and 2 galya borya at the reception. The premium is softer they work, but softer as in softer. I wouldn't say softer, you know, softer is when the low is bad for the millennium ref our swing is softer. No I've got this one pretty good book fixing mash where it sounds a lot like that for the transit that's on the lamp. But it is the rubble lamp trumpet wind instruments clearly so brighter hysteria base more relaxed at. Except but I do not know I was going then when these reformers were migrating and I have a late one here already friendship. I got outraged at this on the leg 50 on these transformer I say okay let's go to the battery. But with a swear word to me as I say something with the outputs to transfer the old man is such a challenge. Here and there then connect them did. That's right I liked it better then it turned out the only thing he had there I never made a transformer on the coil so I'm not.

[00:14:42] And he did the only thing he didn't get there. He had a bell. Well it's generally simple it's just a matter of getting the wiring right so there's no pl. The general rule of thumb is the star principle. And again where this star is going matters. Well and filtration is good. Maybe before with elevators it was difficult to have a large capacity. Now it's just all pre-powered through an active filter and not on the transit as many do now bulbs I have there in 19 active physics are cascades are powered and at power through rossels. And each through its own expensive factory to rossel kinopoisk vegetables flew. So there is nothing at all because it is necessary to have the ear to the speaker right up close. Then what do I want what's in the background on the reception. Not you those who remind 6 19 years old and what they call short appear on the screen metal on it small again. Yes no absolutely no it does not catch 6 with 19 p. The light bulb. Well almost like a 6.30p. A little lower. A powerful stabilization drive for example. I see I am not something to help in these tape recorder stood their in my opinion television first stage. There's a little light bulb here, it's almost like a transit. The metal screens they and the outputs appeared. I had them about 20-odd years ago and I was making lamps. He still had two at the time with all the stuff and these and the comparisons were 6 with 62 cm.

[00:17:16] Nikolai the last letter in your place. It played pretty good for years. A long time ago I gave this vitalik store still in our time it's also at least 20 years ago. Now I am not interested in two private amateurs. Do not live them do not like it. For me it's better to live as paid amateurs, but they are not all right with the horses. It's hard to get good funding. And I told you there is such an intermediate option with rpc cascade dynamic load. That's my preference. There's a couple of these amateurs of less powerful forces, it's two of ten. I have this helper which rpc it does not compensate fair harmonics unlike two so and due to this it was more voiced sounds on the top and the middle and the machine gives almost as two stages. That is, only the load pumps well. Such a technique. I've been fond of it for several years now and I'm not interested in two stabs anymore. I'm a dog, for example. To be honest with you I was very young and I was more into this kind of thing with the tape recorders and this degree of dynamic channels. And that's what I was doing. I was more interested in doing something like that. You're right to say that 6 6 of 62 and that's right. They were used back then too. And it's like you say I'm something like 19 6 out of 19 p hell I'm all about it. But I don't have it anyway. I've got plenty of them even in a box.

[00:20:00] By the way, you can put them on the output of your honor. In general it's an interesting sounding bulb, a lot of people like it. I praise the kievsky tube even in 19 years powerful period very interesting tube. Here I have these 41 are on the output. I really liked them from a long time ago. I have used them in two cab cabs and rpp highway at 19 hours 6 6 May 41 is called the bulb it is like a 44 a little bit maybe smaller. Almost the same as in the 44 only there is no pack on top but at the bottom it is more convenient for example. That said someone and for example familiar to you. I had a lot of the first ones. I don't even count them, I used to give them to Kuchma. And who reproaches radio Vasiliy 4 center boris kilowatts to the more of his city he tells kupriyanov. [00:09:40] radio 6 gleba kharitonov 6 galya ivan. Good night. Five ten 59 but you're receiving it's zhenya station 9 under 20. There's another year. Peter but at alexander's reception

[00:09:58] Yes petr thank you luda perfectly understand for 9 plus 15 clean fine. Anatoly at the reception again.

[00:10:10] Very understandable but clean but clean. I'm sure you can hear the turbine in there and I'm looking for it. It's triggered it adds turbine and when it's automatically added but there's noise there too. But in my room I can hear it well on the air. If you say well, you'll shout I leave clear, something like a station is all over the group dispersed. At one of the work so to no avail please on red sulim mike.

[00:10:49] Yes yes peter the same thing. Yeah I have the same here.

[00:10:55] Rather spinning then noisy yes.

[00:10:58] But yours is stronger I can hear yes well. There was good luck 373.

[00:11:04] Yeah I see. But for one minute, I'll keep it clean. Kind of like the eighth in the pause heard me here your eugenia ivanovna who was 8 reception.

[00:11:14] I know everything. I she was doing with what galina borisovna hello. He was giving advice he included different pitches. Pyotr Arkadyevich plus I was offered I'm a retired cameraman.

[00:11:35] Yes, it's a beautiful moment. Great. Good morning. You're five-nine-nine I accept you. You see, I was working from the local station and in the pause I heard 5 9 +5. Petr petrovna in

alexandrovskaya it's northwest krai stavropolsky who in exchange how received and anatoly I think will work with you at the reception.

[00:12:02] I understand very well apparently right very well today more than 40 hours meeting with friends and time and your radio is also very great. Peter thank you very much. If I didn't take please excuse me come all the information and I wish you a good day of good health. Peter. Question to oleg be well bye bye.

[00:12:27] Armen a minute late for a minute help. It's just like you heard the balloon reception.

[00:12:35] Yes now I already wanted to know who. Galina borisovna and then. GB me or and i fine yes and leadership galina parige elena day radio laughs luba luba charitonova anatoly red sulim take 5 9 plus 10 at the reception.

[00:13:01] anatoly hello anatoly good night. Oleg are they for italy the one who has 7 galina is very sick. And about the tax inspector pfl themselves reported only by themselves. Wife maria elena we are obliged whether or not at the reception

[00:13:24] Fine who has galina borisovna yelena. I understand you I said for 5 9. Often anatoly red or at the reception.

[00:13:35] People get sick very well valentina thanks anatoly i know gloomy day to you his talents and good mood be well friends of the meeting.

[00:13:45] ah got it but if you don't hurry one more break came then whether on red sulim 73 so listen still yes

[00:13:56] Of course there's time. I wanted to keep just the anatolium. So I decided to do without prejudice to the admission.

[00:14:10] Yeah I wanted to run away but you came up and anatolius is somebody shouted for one second. Be careful whoever please

[00:14:20] Hit 8 about war. And she tamara 8 misha dima my mom jan 9 plus 15 alexandra city red ray at the reception.

[00:14:34] this is alexander yuliana samara 81 pleasure galina boris elena alexandra hello friends do loud operation plus sports. Perhaps such a little bit on purpose arrived charmed very well understand me city run alexander district.

[00:14:58] Yes chess jan glad to hear. Have a good day until you meet the host mike then 35 years old at the reception.

[00:15:08] Understood owning amin thank you for 48 kopecks that Igor Ivanovich 73 but I understand since the eighth district near neighbors there it's hard for you to hear for now would be good 73.

[00:15:26] Now thank you so much for the connection and friends then business I want in the world a strong group health and peace your home longevity so far 73.

[00:15:39] alexander good morning here your regalia ivan petr alexander 9 well also for 20. Loud reception.

[00:15:47] alexander good morning. 35 in red ray alexander at the reception. So 8 mb. Ulyana tamara 8 misha dima.

[00:16:01] And yes I something this number in the five cher I don't know after which leader. Here and maria dima your galya and ivan repeatedly and not two times of course worked always loud cool taking something like that. So this is the oldest in the family. We attacked all talked about her antennas and decided I'll drink there a thing even 850 rubles is the most initiators two kilos free at 330 pic. I will be the maestro himself. Reception.

[00:16:43] Oh I see I don't know I have a triangle with a counterweight. I'm happy with it. It's great to work the far east. Sometimes there's a group of five to six people standing around and no one can hear one I can hear and I'm on the receiving end.

[00:17:01] It's not clear clear. Certainly your antenna is working well. But there's still even the same thing to put up more accurately but also the antenna you know the ground penetration and the conditions there and geographically and so on and so forth. Then even if I am in the center of the city, I have air noise. Right now I was looking at 5.5 points but another 2 3 points as a science station goes even with a thick antenna pleasure you can hear but don't give reception.

[00:17:37] And one thing is clear I have a beautiful place here. The street is 37 yards of them 37 yards. A week ago a neighbor died there are two oranges left and the rest are not on reception.

[00:17:56] See how it is. But all in all yes people are suing people are fighting people it's pandemic torn everybody touched me amongst others. And now there's one left and you know one kind of jokingly says boil pick say crazy and uk to the dumpster brought

[00:18:25] I'm not used to it. And I'm like 20 years old and I'm a horse and not a sissy maybe but my wife really died 10 years ago God rest her soul. But practically she was working and I was a housewife on the receiving end here.

[00:18:47] And here I'd give anything for the way I am. Letting her do the housework there as well, but of course she was running it all. Now I'm looking at a kilo of plates so many cups so many pots and pans. I think for fuck's sake I have a bigger one which is more talking and a

smaller one which is porridge all I don't need anymore. But chicks are chicks they are all class guys. All of us pandemic Sasha took away my grandmother. Children grandchildren. Comes what's here like you sit them and years on nicely.

[00:19:32] And this situation is familiar. So there's nothing surprising. It makes us go to war, though. My eldest son has been taken away for 53 years. My grandson was taken away and is fighting somewhere near Kharkov.

[00:19:51] I'm bored with this whole thing. Slavs were poisoned Slavs were poisoned. All these fairy tales are rubbing their hands together. So what's this all about. Well, usually how this picture will turn the smerds inside out. Okay, let us not talk about politics because as many people as there are opinions in Dnipropetrovsk or in Dnipro for 10 years sitting behind the same desk. That's where Vovochka is. He did not talk to his sister for a week, he said, 'You are an occupant, or are you crazy? I don't want to talk. That's it.

[00:20:47] But this situation is familiar to me. My wife's own sister went to Kharkov where my son my own father went home to visit his aunts. I haven't seen her for a long time, I went in to say hello, she said, "You are occupiers, you are so shady, go and say daddy. Instead of saying hello, goodbye. At the reception.

[00:21:18] Well you see how the people suffer from this. All right, I probably won't work on calls today. Went through the groups standing on 8 e 9 e. I'm not a fan of these groups. Here and 8 m that you will work on the call to leave the frequency, although this very moment said somewhere near the eighth district joined. But nevertheless let's 73 bye bye.

[00:21:51] Will pass by my yura come up yura you come up

[00:21:56] And started greeting good night June 8 on radio 8 center boris ivanovich plus I see his city of lower tagil for example.

[00:22:07] Good morning Yura glad to hear you too. 25 very great to see you at the reception today.

[00:22:15] Yes petr you ran 6 go and radio 8 center boris radio petr press. Good night. I don't know if I ran away or not, but then I'll have to go to Nizhny Tagil for example.

[00:22:28] Yes fine yes no yur well since alexander said that the correspondent came up and what about in general. Good morning. Five nine five nine by 15. We have a great pass today. Petr petrov alexander omsk at the reception.

[00:22:46] Petr accepted. Thanks buddy. What's the point if. We've always been listening and praying. Goodbye until we meet again.

[00:22:56] Thank you very much. Well leave with alexander here to talk or work. Come on friends, I'll take a look and then an approximate pillow. In case Alexander comes, you'll get a T-shirt from me 73 with Masha good luck.

[00:23:13] Already my girlfriends about the bottom one can't come up the garden will start good day to you petya be well 73

[00:23:24] Soon. Okay bye.

[00:23:28] Yes, Yura, but last night the computer didn't work much. I spent all night with the computer all day yesterday till 19 o'clock doing repairs in short I replaced all sections of the processor replaced the motherboard nothing works like new at the reception.

[00:23:53] Okay I see. Well everything is great and I can go here too I'm in this computer like it doesn't think back and forth I have such a good idea everything restarts and it yells again. What's the reason for that for example.

[00:24:14] What's the reason. I'm on my own right now without internet a weak processor and not much RAM there's a lot of humor on the receiving end

[00:24:28] He's got a RAM record with that for example

[00:24:32] Yeah the points that are put out there versus this one if I have 8 and oh my memory is good enough to spare. Usually if the old computers there's the world then cost very little operatives it starts to rebel at the reception.

[00:24:53] Yeah yeah yeah. Give me some more I didn't understand what year I started with the army came and in the army came and collected it and still the operatives are apparently old outdated and I change. And Ivanych understood everything did everything great for example.

[00:25:14] Well there I clearly understood if such a file inside the computer resources there is added RAM but it's a complicated battle system for you although I tell you I build the computer myself adjusts the programs. I know every program from the inside out all the functions it performs on the receiving end.

[00:25:40] Opinion Ivanovich I'm only in classmates hockey and back and forth how to remove someone even from men. In general this music of mine I listen cool music try not necessarily accept.

[00:25:56] Well let's hear who's got

[00:25:59] And who else do we have

[00:26:04] Let's hear who I parizhu where 8 e go gave the jersey 20 plus alexandra red ray at the reception.

[00:26:13] alexander good morning health and also not only years 20 25

[00:26:24] But I hear you today went around no problem. Listen Nizhny Tagil

[00:26:31] Good morning. Who has today paris by men center yaroshuk 55 take her in the city of lower tagil for example ural gave birth to a boy. Good morning. Worked and also traded and 15 at the essence give then no found which you can bite goodbye to see you.

[00:26:58] Ivanovich who love morning 8 andersson rahmanov. To you best wishes for a good day 73

[00:27:07] Good luck to you, good health to you

[00:27:10] Home. Andrei Nikolayevich. Nikolai anna at all little what she herself maniac 20 plus alexander red ray at the reception at the theater is also a powerful frame. Sash listen to us.

[00:27:37] good morning he hears it on the radio 8 centers boris yakovlevich. Yura Nizhny Tagil, for example.

[00:27:47] I expect a good dancer from you. But at the same time us.

[00:27:56] Hold for action stable 10 euro reception also a stable measure. Thank you buddy hand 73 goodbye bye Ivanovich.

[00:28:08] Chess round is a good class 73 min.

[00:28:14] sascha yura guys well respected question I have for you happiness health 79 goodbye

[00:28:21] Well, it's a good measure but I'm not really there yet, there's a little bit of work to do on the graphics editor, it's a little bit wrong on the back. But let's go a couple of times with construction or something at the reception.

[00:28:46] Think a lot more and I was already standing there in sochi Valera was as usual a group for example.

[00:28:54] But I didn't want to get involved because. I had a resonant frequency gone to three 530 that went into the country 680 to 530. More than 120 yes more than 120 people flew the frequency I didn't dare turn on and now the resonance trends 515 still low on the reception.

[00:29:25] Ivanovich due to weather conditions for example

[00:29:29] Yes, at night it's up to the point where it shows up in words and analysis I only observe it in my own way and 160 I tuned it for including flew the frequency built and okay at night I turn it on at night I look it flew away again and before I go on the air I check it again in the water at the reception.

[00:29:58] Wow. What do you have snow or rain like that.

[00:30:02] So I let it down about five centimeters. And now I dropped off the motorcade it's snowing with rain of no idea what the mood is.

[00:30:13] But then when it's dry it's going to check the luck and the plan I kind of had asked for 370 too and in the fall and set it up for frost and it starts flying away too 3 640 somewhere down here went. I also need to tame it a little. Ivanovich for example.

[00:30:36] Well yes I have the potatoes standing long and it's not enough to tame it a little bit and I have somewhere within 250 kilometers it's hard for her to respond to 11 positions and only snow and on the spot the potatoes disappear it's not even enough to go to the frequency. And then when she's good she'll fly away from me somewhere in the range of 3,740 will be on reception.

[00:31:09] Well it's understandable. But to the main grid to look for. Okay thanks, I've been sitting up all night and here's another one like this.

[00:31:21] Click hear yana tamara and misha dima. And now that one has such strong footsteps and maximum reception. Good morning. Nikolai good morning. Anton nikolai who.

[00:31:38] Blame.

[00:31:41] Who has today. Nikolai solomon 15 plus alexandra red ray at the reception. In the past.

[00:31:53] The year I also hiked by

[00:32:00] Yes it's absolutely wonderful to listen to one of these.

[00:32:05] There's valera there for, like, three hours more coming up. Anyway olga she's nikolai.

[00:32:13] Yes near the very compromise took place.

[00:32:21] And lazar evgenievich sprinkle. Let's finish the passage. Who now has even errors can not read sprinkle head Ivanovich mother

[00:32:33] Nikolai and you will work hard. I just woke up. Good morning ivan da marya pavel. 2 5 9 10 15 plus nikolai petrovskaya olga maria pavel

[00:32:47] At the reception

[00:32:49] Sasha. Good morning. Petrovskaya me

[00:32:55] Already noted in the morning

[00:32:57] Candidate I help habib.

[00:33:02] What's more I notice thanks to the presenters. In winter she nikolai. Misha dima rahman khabib john allen cole best wishes for a good day you 73.

[00:33:18] Thank you alexander nikolaevich for the case held. I thanked 73 for now.

[00:33:24] alexander bye bye but kolya work for the rate and reasonable good morning to you pavel melody 15 27 I saw something like that this is my reception

[00:33:42] Kolya signed. Good night morning radio 8 center where I got mixed up with valera and I apologize. 10 15 kolya. Yura resort regions approximately. Sasha plushchev.

[00:34:01] And it's a wonderful thing that the snow is wet and on the trees where the branches are waking up they're breaking and levante it's all fucked up. Of course I'll look the fuck up. I never found it taken slowly at the reception is taken.

[00:34:25] I got it Pavel from andrei ivanovich the same trouble not even sleep during the day somewhere zero +1 no snow no rain. Okay okay April 8 morning 2 mp Ivan and Kolya and let's go. You just come up I all this night listen to myself and not be sick and shake hands 73 Ivanovich for a bonus.

[00:34:52] Well good kids until the meeting all. And what else fits. Misha dima listening only misha dima desktop saber kirova. Nikolai good morning openly no mood. Good morning. 50 for 40. Not to mention Kirovsky district of Leningrad Princess Maria Pavel where sat Nikolai Petrovskaya time dogs also do not stand 40 whispered among themselves. Nicholas I at night already such. And he still working as was on the host microphone passing not bad I own the center sound tamara. Yura came three so I grew up really good for 30. Kolya thanked. If there are no questions in the country best wishes and masses if you have been asked this question I am grateful for the answer. And we went through it too 25.

[00:36:09] Just as chic all without a problem. Thank you friends.

[00:36:13] Happy snowy outing

[00:36:18] It's spring so it's raining

[00:36:21] Also not now

[00:36:23] Reduced clouds probably something or snow

[00:36:26] Could be what you're having.

[00:36:30] Nikolai health. alexander ivanovich health to you and your relatives

[00:36:35] In the stage of the bench then I can't tea yet like 2.3 percent melting snow this match mom was so happy to meet nikolai when I sat for 24 hours but did the computer replaced makarenko and the process at the reception. And already so I have not defined what exactly. Our young mother for this processor does not exist and for the other mother processor does not fit and left there I still have a mother processor professor well in short, different processors to each other do not change at the reception. Well I know but most likely the processor processor passed it and the suspicion is on the processor and there who knows I did not throw it away in case I find such a motherboard to check I will try

[00:37:35] He

[00:37:35] He doesn't ask for food, he puts it on the receiver and I'm afraid for it. Before this process I don't know I've never tried it and I'm scared you know

[00:37:48] She

[00:37:48] Preferably for this heat to be replaced but I'm afraid for it personally the receiver and for that and suspicion I should have changed the mass. I kept thinking that I was just about to silently reach for it. You'd think I'd wait until the summer for good weather to take it apart. And when I rushed I imagine soon processor taking off this fan aviator. And there's a bunch of bees started throwing from there to the fan and almost everything else in the eyes. Now my computer is quiet and I can't hear on the intake fan navigator will take care of it.

[00:38:38] But the processor will have to praise people my idea

[00:38:44] I don't know I've never tried it. And there's nothing complicated there. Kolya taking down chess. A gladiator fan from the processor. There's a kind of spring there from three to and the processor easily takes out on the processor there's a translator marked and for the mother's will triumph man choose this process radicals or something small thin layer on the asad you wear like a bank card but in a dumb kind of badge untied with a thin layer again you put there socket carefully there and it itself as abbas and fell there in the socket and again went to the post place on top the processor and go to reception. Yeah, I don't give a fuck about that anymore.

[00:39:46] Didn't turn and

[00:39:49] Don't understand carefully you yes don't take but just by the processor housing carefully pick up everything and try that daddy if you don't really fall on the callus because if it gets in it can short out the water on the reception.

[00:40:08] Understood understandably.

[00:40:10] But while I haven't made up my mind yet morally I'm not ripe for the reception. Otherwise, I almost took the video cameras to the base, too.

[00:40:34] In can play very. I think we should have a family vacation.

[00:40:47] I certainly respect this alexei mikhailovich film.

[00:40:58] Officials don't fan the apartments. For these purposes. And loudly answer firmly. Andrei answer. I naturally write this dynamo wanted an answer. 50. Leader.

[00:41:51] Even. With things and.

[00:42:05] Everywhere I can these.

websdr_recording_2022-03-04T02_10_10Z_3690.0kHz.wav

[00:00:06] Ukrainians if they see this bye bye shows.

[00:00:23] Good morning. What's up. Yes I am.

[00:00:34] She should. And should explore. Father the end of who scattered where someone is entitled to work the Damascus of Kuibyshev worked at the end. I say that really ran at. Just as they say went about their business crouched next to the computer. And now also turned on. I'll go, Sash, I won't hang around between you there, you kind of help not to work. Russia at the reception of Nikolai Vorobiev the weak link. Well, what was it the last time you called me? What was it that didn't work for you? The most interesting thing was the same microphones that the firm if you keep the money. Already started. Good morning. How.

[00:02:22] From this group like already. At least.

[00:02:29] For the finals. I would state. Or you and the four would get kicked out.

[00:02:59] There's always in customs.

[00:03:06] One son mom and mom I'm afraid. Offended give berlin more desperately and themselves. But I'm wrong. V. Dymarsky it's time because the theme is good because it's

probably the form. But after all, the competition is back. Expected. This. If chelsea finds a club europe. Here's an idea we met on Lenin Prospect and it is immediately clear why I tried to teach it well too, but it's this one. All kind of already attributes all these settings. That's why everything seems to work out fine. I got it okay let's show you all the goodness three. Good day to you alexander nikolayevich victor. Good day to the radio fedor leonid. Also 50 plus two varshavsky sasha alexander centimeters 7 there in general normal all cars in the snow and bare trees a few drops goes. In general, such information for the reception. It is clear I at one time already expressed potatoes. Now what is not even allowed to throw buckets of checks there and the chickens have already taken out the stairwell. They live there not knowing what will happen next. Probably they will all be frost will not be there all the time and the rains give us all the time. As understood the reception. Now a second. It is coming up and I can hear it on the frequency. Communications. It's true there will be a pause so it's too early to hide the shovel and decided to get a machine to clear the snow for example to water everyone. Arsenal hit. Buy that took everybody I hope was heard at the reception and me equally as me and about her almost no and you have since April 9 he felt it on my transfer he bought me on my ranch pure north and I then he me four tables three.

[00:08:27] Tankers work that way. For example I have a low and he's in. At the same moment this antenna range I understandably have 8 meters is 8 meters at impact. All right, Kolya, I can't hear him, I couldn't make anything out. Thank you on the microphone. Behind me, I paid for the coffee. So please, everyone is invited by Roman. 3. Leonid invites and malta. Roman Leonid everything turns into the center. Roman Leonid tragachev at the reception. And your wife tamara moose and misha dima on the frequency of that and misha dima to all. Yes, Nikolai, I probably went to the pot with this computer, I didn't even make dinner and went to sleep at the reception. Of course I'm like that myself. I'm busy with something like that. What needs to be done. I don't regret shit and I don't fucking sleep at the reception. We ran out at night and I sat with this computer until the morning, visited so much dirt so much dust was this horror. And then I started going through these mother processors back and forth, and I forgot what washes are the most to look for and do not run. Can not be then my sister-in-law came to visit me I just before the arrival got the documentation went to the circus to run. Then she had already left in the evening, I took it apart, launched this mothership a few times checked and then let's kiss it in this court. But that's okay, I'm home for the reception. The main thing is that it worked and the rest is still on its own. The most important thing is that I didn't have to install the system and follow up plugged in and all that was there.

[00:13:34] Just a macarenko processor left replaced the second field all good at the meeting went I'm retired. Yes I take the stavropolis of everything. For example. On my knees moscow accepted but what on the street was not. I live on the outskirts of the ostrog and that price goes for a hut on the road. I have a field there like a pine tree. Now it is spring, it is snowing all over, but I have not been outdoors. Plus four yesterday it wasn't. At this time. As you know earlier God forbid winter comes in September at the reception. Yes yes all accepted all this but we already had warm weather. Today it is 17 degrees at night the temperature drops sharply in 5 degrees winds snowing and raining. I made a choice and made that choice and not one step forward backwards. At 57 years old that's saying something at the reception. Yeah, I get it, we're on a boat together. All right, well, good luck with your health. I'm gonna go get the urn before I'm out of here. All right I'll give the door a little bit because I should have always gone into the cabin. [00:17:00] And as for the appeal two years very good here's the weather unlike us it's 20 degrees such weather. In the fall happened about 10 degrees so far nothing to say.
