

[00:00:01] Locals, including us, are now seeing a variety of bills. I can't even keep track of what's being proposed to make people responsible for allegedly distributing rations about the war and allegedly wanting to call for it. In any case, I won't go into detail, but I think a lot of our viewers know who he is. He suggests punishing those who took part in anti-war actions by sending them off to war. You know, could you comment on what is going on in Russia right now? In the legal sense it looks like a law-enforcement hysteria, because what we see on TV at the Prosecutor General's Office we see Roskomnadzor blockades that have absolutely nothing to do with the law, they were done in violation of procedure and in violation of the law, and the person who was broadcasting the war was removed from Echo Moskv and threatening people who opposed the war with those who went to protest the war. We see threats against people who are trying to help Ukrainian refugees and the Ukrainian military. Accordingly, all of the bills are written with songs by Alla Pugacheva and to suppress the anti-war movements that have gained momentum because these projects are not really precedents, although in the history of modern Russia and the Soviet Union the same major achievements we can only judge very interesting events optimism are aimed specifically at intimidating people who continue to take to the streets despite the huge number of supportive if for example Putin motives that have shown the public are not afraid.

[00:02:27] Because if Putin's rating I think is too much then at some point it stops working. I don't think it's any election or anything else right now. Some people say I'm beyond politics it's war it's deaths it's aggressive war and bombing of civilian targets. So now there is a feeling that people have these notions of traditional that worked before they don't work anymore. Accordingly in your text about which you write about the statement of the general prosecutor's office you say that this very statement has nothing to do with the law why can you explain. We still have on the territory of the Russian Federation, by the way, if it works and the article which guarantees the right to freedom of assembly in the essence of the General Prosecutor's Office check says that the implementation of the constitutional right to freedom of assembly and views on them explains no harm to property and health of people. People come out with posters young my relatives. The Prosecutor General's Office says the implementation of the constitutional right is extremism. And in fact this tour can not assert a special right to be illegal.

[00:03:48] That's the first thing. And the second is that the attorney general's office says it bases its thesis on the fact that people come out at the call of allegedly destructive extremist

organizations. But let me tell you, if you open up social networks and especially foreign ones, which are not censored now, you will see a huge number of calls for users to come out and protest. And if it's not organized by any one entity or by any politician. It's ordinary people who don't want war who don't want blood who don't agree to be involved in these aggressive actions against another state and against these people. So it is impossible to determine who exactly organized the protest because now it is the voices of many thousands of people and on the calls of the Prosecutor General's Office that they come out of this conflict it is impossible to determine not to write in the indictment how they find out the person simply of his own free will because he is against the count and he came. We'll have to reinstate. It is clear that now to talk about the law and its enforcement is a little sly because there is a feeling that wartime is not only war in Ukraine and wartime in fact and comes not in terms of law enforcement so I think that now all the dissenters even intimidate. And when the active phase of the conflict is over, they can go on a witch hunt and such a tough story, for example, about which I feel there is a lot more

[00:05:42] Than I ever have and absolutely. And I can't help but

[00:05:48] To ask, though, the Federation Council is scheduled to meet tomorrow, and there are a lot of alarming reports that tomorrow they may impose martial law in Russia. What will this change in the legal field? This is absolutely everything. Martial law is the harshest legal regime. And they can restrict any rights of citizens to freedom of action. And it could be. And always others specifically mentioned curfew can isolate people who are citizens of the state where there is a war. That is conventionally all Ukrainians who are in Russia are isolated, and there are quite a few of them. As far as I know, there can be mobilized citizens who are military citizens and then can be involved in the entire day of oprichnik in, let's say, Ukraine. And very very huge powers. Now military censorship is being introduced or a ban is being imposed on non-profit organizations of political parties. That is, I have no confidence that international organizations can be banned if the state considers them sympathetic to the other side of the military conflict. But then again martial law can only be imposed if there is either a real threat or an attempt on domestic sovereignty. And how did russia invade ukraine. And so someone invaded russia. There's no such thing today. And there are quite a few Ukrainian media and central channels. And including today wrote about possible provocations on the border towards russia. That is the roads that stand on.

Also, we promise via satellite that Kiev has released a report citing Russian army losses Ukrainian armed forces say about 9,000 soldiers have been killed and wounded since the start of the military invasion of Ukraine. I will draw your attention to the fact that the president of the country and other high-ranking officials often say that 9,000 are losses. In military parlance, army casualties are people who cannot continue to serve.

So it's not necessarily the dead, but it's also the wounded. And the first footage of the negotiations between the Russian and Ukrainian sides appeared 15 minutes ago, Mikhail Podolyan, advisor to President Zelensky, reported and the main demands of the Ukrainian side are an immediate cease-fire and humanitarian corridors to get civilians out of the villages and towns destroyed and constantly being shelled. But also the actual footage of the start of the meeting. Let's Get Married. Negotiations are going on at the moment as soon as information about some of the first results appears, we will tell you immediately about our specifics of the state emergency service of Ukraine reports rescuers continue to dismantle the consequences of shelling in Chernihiv from under the rubble have already taken out the bodies of twenty-two people who died. We are talking about civilians not military personnel. Russian troops continue shelling the peaceful city of the regional center where about 300 thousand people live. No further comments. [00:01:21] Russian oligarch alexey miller won. They should know exactly everything that they need to move faster than anyone else including because they know that this is what the risks are for the whole world and not just for Ukraine. And they have to help in this and they have to talk about it publicly in public with russia. You see this is very important because you have such an unpleasant once again experience and understanding from the whole history of germany. It is small in history because history is powerful in Ukraine is great physicists mathematicians country a lot in it a lot of things great in germany in music for example. But so it happens that one on the drop you know one new suit on the drop fell and all see such a red as if one. And here in this case it's red with blood. So are we. So it's very important to stop this process and the waves and they're going to help us a lot in that. Which works here. Because here we have to be and look for another way yes how to make the business or the relationship or some kind of energy humor remain. Everything is in the past. Now everybody has to think about the future. And I don't think there is. And that's what ilienko with the charming smile. Can you talk about the conditions in which you have been living since the beginning of the war. I have to say it's hard to believe now, but life is as it is without any embellishments. I have wonderful Russian patriots today. I think I'm needed. It seems to me that this is the main meaning of life that you are needed and to walk and ask that you are not just something you eat. It's very important that what you live depends on many things are important to and feel that your life is important to others. That's okay. Why would you be in the position of president. As for the assets of Russian companies in the rf we are in ukraine today being nationalized we are against international terrorism in the new laws.

[00:04:24] Although we have just one more escort on the use of the zone in Ukraine through humanitarian corridors to evacuate officials. But when you get my point.

[00:04:52] For me, the terms of what they respond to us in return. Our task today is to say so. Actually the story is not about conditions. The story is about the fact that there is a topic of questions. We're ready for all these topics if we say the Russian side has long formulated answers to their questions. I simply believe that what is the point of asking questions if you already have an answer. And that, it seems to me, is the difficulty of this dialogue so far because there are things where you have to find some kind of compromise so people don't die. But there are things in which there is no compromise but simply because you can't just leave and say yes this is your country. Ukraine is part of russia. You can't understand why you would suggest that to us. But I think this is the kind of thing that they're just squeamish about, it just flies. The word is not a sparrow, but there are quite a few of these birds now. So I think there are points there. I don't relate to the wording that's out there like Constantine. I think those wording are fair to the side that is willing to destroy us for the sake of those issues. They are fair to our dialogue. I want to stop the war. It's a question of wording. The question of the balance of our arrangements and the sailor

[00:00:00] What are they to us. For us it's not sugar but that we have the ability to overcome them at least we have what day. It's about being friends. By the way an interesting thing and now it's impossible. With missiles, as usual. As usual for yourself something like that. By the way, today the writer said that in principle it is possible. It may be possible to talk about easing sanctions in the future, but he did not specify, but I think it is all there and a serious reaction, but it will last some time and it will not last forever. There are simply no resources for it and in this sense also to us just the impotence in front of us and generates a blow in the information sphere of course more will hit less. That is why they are trying to throw us off balance especially those who worship Putin because this is the only thing that does not create everything else we see they handed out weapons to the population and started killing each other right and left. A citizen of Israel even thought he was a Chechen. What difference does it make. What difference does it make? I thought I had a submachine gun and I was shooting and it was not in a war situation. The situation is completely relatively peaceful that the Americans who are in Kiev take a walk after curfew and say that his

He is very tense about the large number of people who were given weapons, i.e. he says the weapons were given to criminals and because of this looting and robbery. And he is more afraid that he will be killed and the Ukrainian military will also do these armed bandits. As of today there are no Russian soldiers in Kiev but in the broad sense I understand yes. In fact in general gangsterism and criminals are these concepts by the way to the question of all the people who are these defenders of criminal romance you will not see now what will happen if for example the criminals are allowed to control the situation there will be lawlessness there will be robbery there will be civilian casualties.

[00:02:09] Why they do it. But that's the big question. But nevertheless I think that the chaos that they are wreaking will eventually devour them. They think that these people can effectively confront Russian troops, I think it's a big mistake they will do more damage. By the way this is also evidence of the incompetence of the Ukrainian state as such, you know what it is. This is the 18th year 18 19 years in this respect I there will be only an angel and here there will be Batska Makhno and here they will be quickly their own bandits who will be tormenting civilians, shooting them in the back and letting them go from the war zone. This is the Ukrainian national idea in its incarnation banditism. This is the chaos and rift. The one who has a machine gun in his hands now is right, I have a machine gun in my hands, and you don't have one, and I am right. That is, in fact, all. I think that unfortunately this is also a diagnosis of the Ukrainian state. That is why there should not be any special opinions here either. By the way, I would like to use this opportunity to support our officers who are taking part in this operation. Our first Chechen war unleashed by the democratic president Yeltsin was the last war where conscripts took part. Moreover, even contract servicemen and professionals are not sent to combat zones without personal consent. But I want to support our guys. They're doing the right thing. That's the thing here. History is a cruel thing among other things. It's not what it is on the Internet. But I support these guys. Good luck to you and all the best that its not agreed upon yet. Officials tax services russian pension fund.

[00:04:31] Instead, I wrote a white terror about Ukraine.

[00:04:52] sergei medvedev sergei donetsky. By the way, look how well the virus has surrendered it's all viruses are gone now. The virus disappeared literally scared itself and escaped, it was just necessary to start a special operation like everyone else. Everyone breathed a sigh of relief and there were no restrictions. No virus so I urge everyone to keep their spirits up in general where in fact once again I repeat in fact the situation is quite successful. So less to buy all these cases that come from there and including outright fakes, although it is clear that there are and there are problems and losses are inevitable in any operation. By the way I remind you in 2008 our airplanes in South Ossetia were shot down by Ukrainian crews of Georgian aviation. Here we are at that time in

South South Ossetia suffered air losses in 2008. As of today, at least as far as the planes are concerned. As far as I understand, no losses were sustained, several of our planes were shot down and these same Ukrainian calculations were shot down in Georgia. This is about those who think they did nothing wrong. I'm begging you again, they butchered our soldiers in Chechnya in the early 90s, no one called them, they came because they are the descendants of these same OMON forces. But they do not have the virus and that is good. And about the Internet, by the way, you also need these things. Look how many years in a row people here and at various other sites have been saying we should create our own platforms and services on the Internet to develop proper video hosting and other things. If not all of this we are totally dependent on foreign sources wonderful in quotation marks YouTube is just clogged up with advertising appeals in the form of advertisements for our outright enemies because they have no real way of fighting back in reality. So they're waging war on the internet. And from the point of view from the point of view from the point of view.

websdr_recording_2022-03-03T15 26Z_705028.0kHz.wav

[00:00:00] No no. In my opinion, this is at best a lack of understanding and ignorance of history and at worst outright meanness, while these people will earn money and that's okay by the way saying that you have principles all these artists are graduates and acrobats and dancers of all kinds of dances. It seems to me if one rejects budget money because if the Russian state is so bad they do not receive this money as we see everyone living on this money but at the same time they are ashamed of something there. Once again I say this is the ideology so to speak of the minority, this ideology is actually quite implicit in order to please the masters and some part of them simply does not understand it. Here in our environment so fashionable social networks often force to abandon themselves and we will do it. These people once blamed Pavlik Morozov who waited for his daddy under the Soviets, it is funny no one is forcing you to do anything, but we have given up everything from our grandfathers and great-grandfathers to our fathers. That is what is important here. But if there is a situation of incomprehension of such an outcome of accession, it is stupid enough. With all that said, you have to understand that this is still the case, but the situation. So the question is that our government has played a minority in all these years and made heroes of them to pump money to pump authority of significance. And so far it seems as if a military operation is going on and we have the media there actually pumping on the enemy and for some reason. Why? Because there are a lot of people in government who hate Russians and would like to see as few Russians as possible so that Russia becomes less of a Russian country.

[00:01:51] I think that comes from a lot of things in our lives. And there's no nationalism or anything like that I'm against any kind of radical nationalism. But you just have to understand that Russia without a core in the form of the Russian people has nothing left, just like there is nothing left of Ukraine.

Honestly forgiven. Let's be honest, the news that comes from there about various problems for the population means that people are in a psychopathic situation. A couple more words about psychopaths and by the way here again how many times I said that if you don't have very hard nerves you shouldn't be interested in politics and that social media actually they put people in a state of agitation it's tactful. That's just me being right. Here I've said many times that in fact all this internet well I if roughly even the internet help but that's not even the point. Here is this constant consumption of information here these constant visual normal people make them quite stable in terms of psyche and in borderline moments I was saying that in their borderline state such passive such people easily turn into active such psychosis. And it's happening in front of their eyes. Look at people immersed in social media just not withstanding the pressure because you don't need to be there at all. Because in fact it is not really a matter of your mind and in fact this very presence in the information agenda is endless, it is very difficult for the psyche of any modern person, human nature is not adapted to digest so much information.

[00:03:35] The average person can't check it out. The common man can't understand what's going on, the common man is the object of influence. And he's starting to get on my nerves, and we see that in a lot of people. That's why I said yesterday we have to take it easy. A man can say look something like endlessly pointing a finger at this very phone with the name Ivanova what is called courage, stamina and so on. As for women, when it is necessary to call us, calm down and mind your own business, everything will be all right. That is all. So when all this talk about how you know we were not asked, what is usually scary is another situation that is associated with modern mass culture, this bloating of the ego. I wasn't asked. Usually they ask somebody when the February revolution or the 17 th century happened or when the Great Patriotic War started or somebody asked somebody in the USA when they started the war in Vietnam, for example. asked when there was a referendum about Iraq or when they started something in Iraq Listen don't be idiots honestly nothing for these events and don't know how to treat everything in a measured way yes calmly measured and so on and so forth. A military operation. You can call it a war.

[00:05:01] War it is war indeed, it's going on territory that our geopolitical adversaries have turned into a base of influence over our country. That's pretty much it. In fact, I say again, seriously advice if you can't stand this tension. We've got a blown out of our minds there and you can see that it's blown out. By the way some people in Ukraine are still full of hysterics about it. Just mind your own business. Because what you will be hysterical in general is not very nice. This, too, it seems to me extremely important to understand. By the way as for what happened in Ukraine in Ukraine all you want as you want. In fact, there is a successful military operation and

The psychosis that comes from there hysteria is just a means that they feel that the situation is failing. By the way what they show is interesting there are all sorts of clips, many of them fake, but nevertheless related to torture and mockery of our guys who in small numbers were captured. Well, excuse me, they kind of fell into the hands of the outspoken. Look at how we treat prisoners of war, how they are, which once again confirms that the most active part of this Ukrainian state and armed people on that side are outright scumbags. I've been to the Donbass, these people are members of these premiums and so on and so forth. They are outright scum. So don't side with the terrorists you know there is a syndrome when terrorists are bullied but it's not our fault we kill you but it's not because we are bad but because we don't pay the ransom for you and all that stuff.

[00:07:01] You know, because the civilian population is treated yes. That's why I think it's important to understand the historical significance of what's going on and to show restraint and understand that this problem would have had to be solved, although of course once again it could probably have been solved earlier and the full scale of what's happening is a surprise to me for many people. But although the inevitability of a military operation apparently with strikes on infrastructure I once said because it is probably inevitable, but nevertheless. So that's the way things are and in general I have to say that not even the harsh rhetoric from the West and the harshness and chemical reaction of European countries. I mean the situation has not gone quite the way I would like it to go and they have. And they are by and large just moving these weapons supplies that are not being brought into Poland and now they are not going to overland there to Ukraine if you think it will be as you said special operations as I will add military quite clear targets for Russian aviation I think it is quite possible. And by the way a few more words on sanctions next just go. Because it's very interesting to me to see how the Americans. Look Americans in their reactions and in many of their actions turn out to be more restrained than Europe. Europe's poor Russophobia on the part of the new members of the Eastern European Union, the Poles and the Baltics, is just beating the odds and doesn't know what to do, but the Americans, meanwhile, I think the brunt of the sanctions.

[00:00:00] The logistics of the Ukrainian delegation nevertheless all this time our delegation wasted no time in preparing for the negotiations to summarize all these proposals in three main directions as vladimir medinskiy said these are the military technical cooperation international humanitarian. Obviously those very humanitarian corridors and the political one from the details there are some more pictures taken that are also very curious. On the table of the Ukrainian delegates there is a smiley face with the papers ours has such a rather thick weighty folder with the Russian coat of arms. We hope that whatever the size of these documents there are some

[00:00:52] Key Things

[00:00:53] Recorded that we have agreed with the leadership of Russia with the leadership of Ukraine and that these crimes will be found that they come to us behind closed doors and discuss.

[00:01:12] It's going to get even better from here because already or not. Alexander grigorievich of course maximum peace of mind negotiator we in ukraine careers nowhere in the side only passed

[00:01:25] One car but that's not the main topic either. Anastasia is in direct communication from Belarus. Earlier I can briefly remind you arrived at the negotiations exactly two years ago. Earlier at the same time we started to expect

[00:01:43] The Ukrainian delegation will meet. Restoration at some point

[00:01:50] For three weeks two minutes to go. The Ukrainian delegation will be reduced Podolyan and Resnikov is the defense minister who we

[00:02:06] Then he probably won't be forgotten called a cancerous brain tumor.

[00:02:14] Simultaneously with the start of negotiations said that Kiev will not make concessions on the territorial integrity of Ukraine. This is what the Russian foreign ministry is saying. In contrast to the Ukrainian one, that they are ready for dialogue. In order to prevent bloodshed, the Canadian Minister of Defense announced that he was sending additional lethal weapons to Ukraine, while Turkey, on the contrary, denied supplies. It is said that Kiev purchased the drones from a private company. The Turkish government has nothing to do with this. There is a humanitarian catastrophe in Mariupol and Kharkiv. The Ukrainian military took on the terrorists. What's the point of all the agreements used by the Yigil. For example in Mosul. That is, they use civilians at home as human shields. The nationalists do not allow people to leave Kharkiv. They offer people to leave Mariupol despite the fact that a veteran went to his parents' dacha to dig a bunker. Yesterday were at a concert all to cool and waiting.

[00:03:36] If you can, friends, please get me the book of Hitler's Mein Kampf.

[00:03:44] And then we get posted. And they also make us absolutely

everyone [00:03:54] Wear vyshyvankas but

[00:03:57] You know it's the kind of thread pattern that will hurt but patriotic. I go out on the balcony in the morning and charge from my heart to the sun. That's it. Telling everyone knows the answer is negative. So do not be afraid.

[00:04:20] Come and see us. But let us know beforehand that you paid the money. 1.

[00:04:27] Planes are dangerous. Neither should the train. It's safest to go by white. [00:04:37]

They go regularly attack public transportation.

[00:04:51] And a whole bunch more channels. All this time also channels.

[00:05:01] And understandably doing military operations in Ukraine and it's such a reaction. In particular brought up at the end of our broadcast yesterday the reaction of the obvious minority of people who are really on social media they're making noise about being ashamed of being Russian and so on and so forth. You know, I will come at this problem from the other end a little bit for many years when I was saying that the fact that we left the Russians in the post-Soviet space it is not just so not very beautiful, in fact there are geopolitical in Ukraine. One of the reasons for everything that happened in Ukraine in the last 30 years is exactly the policy of Boris Yeltsin. And unfortunately our authorities in general have not changed obviously in relation to those Russians who remained in Ukraine. Look, the rise of this nationalism in Ukraine actually became possible, that is, when Russia actually abandoned the Russians and I just know the situation in many countries, including Ukraine, tens of millions of people who considered themselves Russians in 91 suddenly found themselves in a suspended, airless space. Russia said that the future of Russia so you as a certain Mr. Yeltsin on this occasion had a very obvious policy and in Ukraine they said our only Ukrainians and Ukrainians are who we Ukrainians are those who share the ideas of Ukrainian nationalism are those who are oriented to the west are those who are ready to rewrite history and so on and so forth.

[00:06:33] And a huge number of people found themselves in a state of severe psychological pressure, they felt like nobody in the historical space, like Russians in the Baltics who had a foreign minister or even stateless people, so they felt like nobody, although before they felt like what is called an integral part of great Russia and great Russian civilization. In this situation, a generation emerged, including ethnically Russian people who had a complete void in their heads in terms of ideology. In fact, this void in Ukraine was filled with radical nationalism, because it has become like an ideology in Ukraine. That is why the Russian question itself which we have long been waved off as well as various thinking democratic and various various intelligent people have always branded the face when this Russian question was raised it is in fact fraught with serious close problems. So now we are dealing in Ukraine with people who are ethnically Russian but for all that they were criticized by Ukrainian nationalists the charms that the Ottoman Empire captured in the same Slavs took away their children and raised them from scratch as only these loyal loyalists

servants of the Ottoman Ottoman Empire. This once again raises the question of Russians including even now. I personally and before was and now I believe that Russia is the historical homeland of Russians and Russian civilization in terms of the implementation of Russians in the civilization process in the historical process.

[00:08:10] So in fact Russians should have the opportunity for those who consider themselves Russians to return to Russia or at least get a Russian passport without any restrictions without any restrictions. I have talked about this many times in various places on the airwaves and I have written about it here many times and I repeat that this will continue to be a problem. Russians all over the world should understand this Russian world, I believe that Russia is their historical homeland. They should not have to beg for the right to be citizens for 50 years and they should not have to beg for the right to consider themselves Russian citizens, they should understand that there is a country that will protect them and that they can return to if they want. This is very important what yeltsin and his team set in this ethnic policy. in fact the same tone was set by the communists during the time of Vladimir Lenin about the fact that the main thing is the national outskirts and the growth of their self-consciousness of the national outskirts. Yes, this is important in the struggle for power in order to seize power. This is what will happen in situations related to the current military operation in Ukraine. That's actually all. So this is extremely important. Special operations and special military operations.

[00:09:37] This is actually important to understand. I personally think that now it is necessary to adopt these laws. For Russians it should be unambiguous. People should be able to make up their minds, otherwise they will have that choice. If you, for example, let's take Ukraine for example. If you want to be this most successful Ukrainian, you have to become a nationalist and give up yourself. Otherwise, you are like a nobody, you are sitting in. Because, for example, becoming a citizen of Russia is quite difficult. That is all. It is not difficult to become a citizen of Russia for a huge number of migrants from other countries who bought themselves passports as not. I think that this situation now if you have not changed it before and did not understand what it is, it must change now. In general this hatred for Russians is a generic feature of our so-called intelligentsia hate for Russians to Russia and everything Russian, and this disease has spread to a part of society, they stopped being Russians long ago. Now I am ashamed that they were always ashamed because it was a password that I am yours, I am from the West. I want to be your friend. What is the password? I am not Russian. Yes, I may be even blood Russian, but I am not Russian as it turned out.

[00:11:00] I see how you do. I sing the same songs in English I wonder like you I wear the same rags as us. I'm just like you. They say look, we got lots of people like you and I'll be the old sort, but people like me will be your friend. We are first class people and I'm a friend of first class people, so they were kind of ashamed of

They were Russians when terrorists and separatists in the Caucasus in the 90s killed Russians, tortured them and ashamed that they were Russians and did not notice how Russians were expelled from the Central Asian republics and Transcaucasia in the 90s and still expel them from their homes. And the same way they were killed and all the time it was a constant shame for them Russians were a priori to blame for everything that you do not know that we did not see it, in fact it is so and now they have the same disease, the same egg disease someone decided to help the Russians or something like that. But let's be honest, Ukraine has positioned itself as a blatantly anti-Russian state, especially in recent years it's blatantly anti-Russian medicine. And whoever is against the Russians is good and whoever helps the Russians is bad.

[00:00:00] Gold medals I can take him to my acquaintances about him but only he I will shoot but such idiots or what. No, I repeat, listen to me and don't worry, we'll help you. We are helping the children at the Olympics. We will represent Ukraine. That will be the support of the whole country. What kind of support is that?

[00:00:27] You will be given a uniform. That's right because that

uniform [00:00:32] gets a lot of attraction. Another question.

[00:00:41] A loco loco a loco chechnya how who will surrender to the Nazis who little military power invincible free independent great Ukrainian army firefighters common where it is. Show me. Yes the second army in Europe then there are hundreds for civilians for protection. Only if you are surrounded there and that's how the Ukrainian nazis are fighting they are hiding behind the backs of the real Ukrainian people even let them come to you the Georgian nazis are hiding behind the backs of civilians. That's how you wear the Ukrainian army, which got into the national team come and here.

[00:01:41] Ghe got the nickname then calmed down and

[00:01:47] For as long as I've been saying Nazis also Ukrainian Nazis stand chest to chest behind the backs of Ukrainian civilians this is how Ukrainian Nazis fight.

[00:01:58] Chechnya's Ramzan Kadyrov reported in his first channel about the defeat of a battalion in Ukraine and the seizure of a military base with weapons and equipment defeated an entire battalion of nationalists over a thousand bandera fighters escaped without resistance our fighters seized the largest military base in Ukraine, Kadyrov said. He noted that a huge amount of weapons, ammunition and also modern armoured vehicles such as tanks⁷, artillery¹² mounts had been found on the territory of the military base.

And Oleg posted on his Facebook a photo inside of this plane, i.e. it confirmed the information that a Ukrainian delegation arrived here in Polish helicopters as a tribunal. It is also very curious. Here in Belovezhskaya Pushcha, they made a circle and helicopters landed on the territory of Belarus and opened their airspace for these two helicopters, perhaps to save time so that the Ukrainian delegation could finally arrive at the talks. It happened after about twenty-six hours, or even more. That is, a little more than a day after Putin had confirmed that Kiev was ready for the second round of negotiations. The Russian delegation was sympathetic to the logistics, although even in comparison to the first round, when 23 hours had passed.

What do you think are the most important measures that still need to be taken to stop the war.

[00:06:12] The blood has gone for a walk. If very much done for this workday for me to see how you at all then I while you here find. Yes yes yes you all are already quiet.

[00:06:42] Oh how scary it is to give up.

[00:00:02] 11 88 how do you hear reception. Before 75 I was 88 how do you hear reception. 59 and rb 88 how do you hear the reception. Elementary the airline directly said maria ivanova alina nikolaevich good evening. I am in the center of the center of the center of the center of the center said. Earlier the head of chechnya mikhail and you briefly say honey.

[00:01:38] Thousands of 60,000 what the situation is today. But nevertheless we have analyzed in one way or another who are told in the first place by official authorities and secondly we often see the situation when for example in the national republics of Russia they are one of the first to tell because these people never tell about their children and secondly it became known that they died in some cases there were reports such as schools where military personnel were studying and or municipal authorities informed about the death of a resident

[00:02:17] Their neighborhood or former high school student. And today there was also a report that Major General Andrei Sukhov, deputy commander of the 41st Army of the Central Military District of Russia, died in the war and the Defense Ministry has not yet officially confirmed this but I saw that some veteran organization wrote about it. You know someone spines says sorry your colleague wrote that it is for the russian side in case the truth is very demoralized whose loss

[00:02:48] If I understand correctly there was one of the commanders of any unit of the vdV and now such a staff general actually became a man who had passed Chechnya in Syria and some other special operations about his death a man from the Kirov region said he headed such military veteran organization combat brotherhood and he was the source of this information while no one confirmed this report tried to check. The problem is that it is quite difficult to obtain information about relatives. Relatives are afraid to answer journalists and confirm

[00:03:37] I think that so Putin is also to blame here and how Putin is destroying the Tatar economy he said I'm so far I'm really sure a lot of Russian guys study the contribution. Such a word and reputation from your words will take money to rebuild. But as with the Germans after the war attract talk shows will be very rich and harmful. Heavy stinking as evil idiots. Before the suicide, he said exactly the right thing to do. You are invaders and I tell you, you know how the Ukrainians called you and now there will be no mercy for you katsaks. We will fight to the end to kill you in the fall. So naturally changed. Write it down really finish. But you will escalate the contribution and the reparation, but I will not forget that all this will still be the katsaks. In general, too, I do not see said and for people to respond to which you are also literally in a week or two. Even if you have rolled from the twenty-first century to the twentieth century and not the second half of the twentieth century and the first half exactly in 1937 kazaks all hoped for it can be called invincible. But it was not like that. History doesn't know you at all, you're outcasts. What's more, even foreigners don't want me. Not for them at all. They sit at the same table with you. Padva was satisfied and remember one thing, there has never been anything like that in Ukraine. But the bad thing was this very hardening in these events of your meetings and evaluations of your mediators rivals. Because there could be some kind of environmental disaster and take your dead people away. If you respect not respect your soldiers if you wish to be slaughtered though you choose we will take you the fuck away not

are needed. Yes indeed send thousands of dead katsaks you have no idea what a disaster for you. For us it is good because you wanted a third killing, but we defended ourselves and everything was being built there, and we will kill many more if you do not stop the katsaks and underdevelopment. I have already repeated several times that General Dudayev is such a

[00:07:04] Was very rich

[00:07:10] Man by and large and our usual Caucasian shepherd for on vladimir vladimirovich they then finally and mechanical without considering

[00:07:44] There will be guns in our case nothing else

[00:07:54] Still to come. Wrestlers. But that war we used to medal russia came to us ran to defend. Look at the empty gates of the teams nothing else. Everything is very simple. You know how to do it. The president of the fcr said we were giving

[00:08:51] Orders order not built

[00:08:58] Which partner didn't build at all. In general a good company asked pardon from Putin. One could also ask for Stepan Bandera's prospectus and start.

[00:09:29] I think it should be different.

[00:09:43] And I'm also in an alliance with my brothers though and talk to that they don't pay at all anymore no living quarters. All think that I'm already brothers that

[00:10:03] That understood well. But what can you do if

[00:10:10] Still don't want to share. But khokhlys. And khokhlys compliments like your snot flying vatniks khokhlys no happy end of the world.

[00:10:31] The Crimeans were so silent until Ukraine when

[00:10:36] Killed

[00:10:39] My son's Saturday Gas Questions

[00:10:44] Set your boot on your own. The answer will be china as well as how else monkeys will take detours home. The third stage of the bribe-hungry. They understand that this is now all in the right direction let's give a good bow for each other. And what's a long time before international companies so much like the big trouble called now knr. Idiots. Yeah nothing touches the dash while it's quiet. Not even. USA. It remains to be seen when it turns out you can touch it with your eyes. even tomorrow someone will have to bury a shovel somewhere

never more banderas no happily ever after in bulgaria sofia turned out. So take your shovels and bury and the deeper the better. On your knees, bitches, beg forgiveness. Do not shout. The khokhlys have fallen silent. What a nation. Who is a Khohol? Where is it written in the annals, there is no such thing. No, they did not even exist. The second one proves where did the Khohols come from, they went straight to Europe. I generally invented the compass in their own way the khokhlov natovtsy, we also have worse pravosiie simpler and more frankly. I even fuck how many left to shout that among other things it is hunger now you will fly too when they come to you in the m17 floor will open in the Crimea

[00:13:57] Bastard over what

[00:14:00] Shut up Khohol. Re Re Re Re Re the banderovets ay yay yay khokhols. Oh we cleaned the khokhls dug the instruments of the working falcon.

[00:00:07] Waiting for people who are now blocked in Mariupol. There was one last question but what to do what to do what to do Edward. What to do with. They won't let anyone out if the guests. I have already said many times I can say it again, but for us it is also important about thousands16

[00:00:27] Foreign mercenaries preferably to compensate for the crushing. The failure of the Ukrainian security forces of Donetsk officially. Visa-free regime is not our business how many arrived about two hundred mercenaries none of whom.

[00:00:47] Russian Defense Ministry forces summoned the defense attaché to the Embassy of Slovakia in Moscow. After the war he was. Croatian citizen's activities were concentrated in

[00:00:59] Fighting in south Ukraine in the year 2013 with the help of a squad of Croatian mercenaries to send to Ukraine. Let's pay attention to what we know

[00:01:09] About the arrival in Ukraine about. Hired. The West with the help of Syrian regime's mercenary planes. International humanitarian law, no need for a lawyer. They are entitled to the status of prisoners of war. The best thing that awaits foreign mercenaries when apprehended is the criminal responsibility for foreign nationals taking place. First of all, you should think before you travel in general there was such information from the official website of the Ministry of Defense where.

[00:01:47] We return to the broadcast of the briefing by Maria Zakharov. The Syrian army with particular cynicism fired on hospitals morgue schools where bomb shelters were set up cemeteries were also shelled by forbidden formations. Mass graves of civilians who were victims of Ukraine's military and political leadership

[00:02:06] Western handlers 21 had more than

[00:02:10] 16 to spontaneous mass graves in one single burial found the remains of a 4-month-old baby. From August to November 21, a total of 295 human remains will be examined and procedurally processed. Initial forensic medical examination of the remains found in all graves in the LNR and DNR indicates that the majority of the dead are women and elderly people. The cause of death was gunshot injuries. Further, in addition to the direct destruction of the population of Donbass by shells, a simply inhumane water and economic transport blockade of Donbass was imposed, which is on the verge of humanitarian disaster. Life in most towns on the contact line is like surviving in war conditions and there is no more heating. No one could simply make a distinction between the local population and tanks I mean the Kiev regime.

[00:03:15] The people of Donbass lived under these conditions. And if these problems

Nearby cafes and hooligans. It's expensive. Why is there no panorama on it? Doesn't it look like an ordinary one? Why should I have a monitor on the track? No, I have a Russian radio, it has a scale showing frequencies. I understand how many kilometres³⁰ it costs, I know it was a quarter of a kopeck but it is expensive now. Let's hear how it will sound. [00:00:00] Choosing the line input in this family course just like the microphone in the course has controls that is the microphone in the course we have here. The maximum I can't remember right now how much there probably don't know now we'll see. I'll try. And plus 70 is the maximum level, plus 70 on temporary asylum. Lyudmila Nikolaevna of course.

[00:00:32] And she's still at home we'll write in positive.

[00:00:41] But it's not firewood for Ukraine it helps keep millions of dollars.

[00:00:46] There was also an admission that under the guise of Nato aid, there might be a two and a half billion dollar construction freeze completely. Let's consider this new and maybe much less before we are well

[00:01:07] People on foot also adjust to bookmarks since a meter from the bookmark text meter there are words microphone I pick up the microphone and not signal level so it doesn't exceed. Roughly speaking 15 dB all more is not necessary he goes from 22 to 15 here and there. This is just get how to say linear linear signal over the microphone and the tract. And here already on that on the 3 I have already entered the minimum. Well roughly speaking of course take as a basis 100 percent. Well, then the error rotates 360 degrees. But if 20 30 40 and went 9 10 degrees just makes 10 degrees. And already on the output I look at the microphone and the tract and gradually add that such in any case because these are the things in the rest.

[00:00:01] I that

[00:00:07] What. Is it even possible to inspire the kingdom you take a version of katyusha balls to leave the devils in the cauldron cooked flying squads supporting crowds of people

the message says. I didn't want to be captured the first time. The thing is, you can look at the same rake again today. At 16 o'clock and along with it I disagree completely.

[00:01:06] Then why exactly. Everyone knows how everyone

[00:01:13] It was in the family. But is it true. Tell him about the future told by nikolai. I know for sure now. Tell him about

[00:01:47] Work. But it will still be interesting.

[00:01:51] Because when you ride the batteries are tied the most important thing bikes.

[00:02:24] But he's 4 centimeters lower in height lower so it's all the same and in height lower I call. I put it up, but it's not quite right. Then I said, "Well, Sergei Pivovarov is advertising. I went to cheer one was such a battery shorter branded such as I had on my Mitsubishi and one on the same day. E my now a minimum And8500. this I took off for a five. And there though the climate he has a foreign car there. On the other hand well nothing on the five. What difference does it make which side of the reception.

[00:03:06] The second point again

[00:03:08] Taki. Socially.

[00:03:16] Here the homeland parried those at all about what stand on strings.

Reception. websdr_recording_2022-03-03T13 13Z_705032.0kHz.wav

[00:00:00] Orders for anyone. The fact that Shoigu only declares it to President Vladimir Putin is a very position.

[00:00:13] Today's main

[00:00:14] The task will be accomplished regardless because you shouldn't have started if it

[00:00:20] At this point. So in this negotiation.

[00:00:22] I think negotiate only humanitarian things and future models.

[00:00:28] Conditions for music and some kind of debate. I don't understand anything. Now our TV news is on our TV, but why do we need

[00:00:43] Our television can interest budget people.

[00:00:47] And I haven't heard anything about what's going on there. It's different people and we can't hear anything like radio freedom in the expulsion worked like the population people need. And he really seems to have started completely under control.

You do not work well in the West, she was afraid, but I heard this Sergei Mironov, yes normal things, but now blocking the window to Europe is normal. I feel safe now when I did absolutely

[00:01:51] A new very independent. I hope at all. Probably would like thousands. I even.

[00:02:13] Ready now the sphere of the most general and

[00:02:17] The mighty independent undefeated free army I'm on the ground ran to the base in hamburg.

[00:02:28] By the yards of the suburbs on the village again hit on.

[00:02:35] Ergo I will further Stalingrad then it will turn out as I say

[00:02:48] Immediately what does he do he's over turned on such ideas. He's about to tell us all how your question about the leaf only we don't have any black earth. Like gold. This is not the first time there have been prepared as far as I know directly his

[00:03:35] Come to visit Andrei Vorobiev

[00:03:41] Underlined by sergei tkachev. We'll recycle you little by little.

[00:03:47] After 7 years richachev what now again where to go to surrender.

[00:03:57] Yesterday male all men not to give up not. [00:04:08] The first place

we go where

[00:04:14] Ran to where and where to run to where as they were distributed. Yes yes yes they fled together to the same U.S. the more they got it was listen Indians where there now again about their women

[00:04:42] They're scaring us again.

[00:04:50] Dobisch himself was deprived of a place to land a convenient target for germany. True, not in the Carpathians, but he where.

[00:05:04] After how many weeks where the man's dog has applied for

[00:05:10] Opening where the nightmare of what it should be she wrote the concept

[00:05:26] As a threat in the lineup

[00:05:31] Moldavia surrounded by short paratroopers by and large the squadron stood in Zaporozhye. When I understand you about what did not manage to conquer anything wanted to protect

[00:06:16] Kharkov Russian partisans said he. [00:06:27]

I'm afraid of even this year.92

[00:06:30] First of all, I would like to

[00:06:38] People knew what a priori could not be. I would even say defending the homeland vladimir ran away from the battlefield vladimir poutine and now still in. Later he will do if like why not to be likened when it comes to house arrest. Today we express batteries. We are well aware of everything.

[00:00:03] Five years ago I promised in

[00:00:36] Short work deadlines.

[00:00:40] This is my task. I knew very well that any store from the real store to midnight when everything falls apart understand this more than Putin and Yuri Mikhailovich easily gets working aides on the road. Commentators decided to do

[00:01:35] Already that it's not all that good

[00:01:40] What do they call the actions of Ukrainian battalions. This is to talk about the people who are now blocked in Mariupol the last question is what to do

[00:01:53] What to do the inhabitants of Mariupol they will not let anyone out and if I can repeat again the most important thing is the successful offensive on

[00:02:07] The plan that we are carrying out swung to take away the remaining military baroque that are in when those in Mariupol they will realize that the help is never again

[00:02:18] It won't because the picture is not ready to help yet. They're hoping it will happen.

[00:02:24] And if they don't want that means that the military operation is exactly what it is. The Russian Federation is showing how they know how to operate on the territory of Ukraine not just forward as they showed when they know how to do it. We can't use that position in history. What to do. Getting into this game everyone says night hunters will beat all their equipment.

[00:02:55] Where the hell are they going to go. And on the sly. And all absolutely not.

[00:03:07] What a thought has right now special means paid hunters all the equipment will beat these drugs then already achieve. Why. I'll explain why.

Because society us they offer us so when we met with reality zelensky dissolved as he will disappear to find his place in this case still alive career I would like to learn about the fires died not the first year I know for sure that no one can change.

[00:04:22] If you look

[00:04:26] How zhenka went to buy it is not very clear before this kolomoisky america only finally left the main themes I

[00:04:42] I can only speak for me the subject has gone understand and he has the last station now

[00:04:48] Leaving. Everybody let's go all the way. So you know I have a dozen other Americans of course oblige Ukraine oblige

[00:04:59] Russia another one after another. Why do the Americans now continue to supply arms to the khokhli. Why shovels and did bandera bury what any i like old dug up freaks.

[00:05:23] And let's get our hands and feet tied.

websdr_recording_2022-03-03T13 53Z_705018.0kHz.wav

[00:00:00] First time

[00:00:05] About that in Paris Perova was getting some

[00:00:16] Dugout robe and lived in a dugout. We haven't figured out who I am yet. Sergei but where did you disappear to. At the dugout sergei these defenders are afraid to put on the stadiums arrived.

I live in the woods. And where

[00:00:40] Found a landing time in the woods for another

[00:00:44] Side. Where in Ukraine. There got the lodges to amplify the firewood visited the office of the museum general

[00:01:01] Nazarova was afraid to go far at all won all the planes were shot down by ours

[00:01:15] Planes. The delight is the strategy. And what can be so careless to do such a

[00:01:26] Power has already flowed in Crimea. And what's left at all for Ukraine.

[00:01:34] Some other long time ago but it's all good. Nevertheless, the situation becomes clear and transparent. So I. As usual.

[00:02:02] When people want analysis or and the same governor

[00:02:14] Battery my work day. I'm a young man from the backwoods I categorically do not see the attenuation. I can't work about what it's over without considering the fact that

[00:02:51] I've never been defined yet. It's time when I come home the fisherman is not heard at all

[00:03:08] And all in swear words. And I give myself this under to tell in what [00:03:36]

Conditions in which I live I feel I do not speak

[00:04:04] O

[00:04:06] Companies even if I. Recall. Personally, I didn't say anything. I don't know that if I were more of a novice

[00:05:05] According to the other side if it were no one needed more

[00:05:43] Or the less important

[00:05:48] Moment. If I.

websdr_recording_2022-03-03T13 53Z_705012.0kHz.wav

[00:00:00] The elderly population. So it's a difficult situation. When we say that the humanitarian situation. We are trying to save people who are in Mariupol because we say these are our people, we are responsible for them. I think that all that you tell the situation on the front as you see the progress. In Mariupol everyone complains even more. In the suburbs of Mariupol Volnovakha the cleansing process is over

cities. I think in the next few days, most likely tomorrow morning, I have already made the official announcement that the city is completely under our control. We should continue to move towards the state border of our republic and after that there will be a ring around the military grouping which is

[00:00:48] Near Donetsk and Gorlovka. Today the main

[00:00:53] The working trip of the head of the Donetsk people's militia. On this if you understand to shake our freedom and other things and back by mistake or someone else we thus all calculated to stall she did not. So it was of course Germany has to pay. And in spite of all the sacrifices there would have been two days, three days, and the whole thing would have been closed long ago. But the fact is that we are carrying out peacekeeping tasks, that is the problem. At the same time, decent guys have believed for six months, and we all understand that this is not their fault. It would be better if they understood the mechanism of support is ok ok but why determine the nationality will be lost pointlessly downgrade.

[00:02:20] Butter butter as it were

[00:02:25] Noted above it's difficult to apply aviation now even under and do

[00:02:36] These bombings aren't quite right either. But maybe that's why and where it's coming from. It's going well. The administration has to pronounce that I don't know how this is going to end.

[00:02:56] But again, the civilian population will suffer. People can only impose a scenario.

[00:03:05] Let's say skis. Enough is enough to understand that

[00:03:16] Before he should not be Russian. What's the point. The corridor is to create it in mariupol. It is done in the form of a triangle

[00:03:29] Released specifically here to the island [00:03:34] Wide

area. And gradually toward the center it fought. [00:03:39] Thus the

usa. And is that kind of panic possible.

[00:03:47] I honestly don't know shouted shouted and sighed more and more Vyacheslav Sergeyevich. To all he has the battery always he has the battery always out himself always the battery leaving and even at night.

[00:04:25] But for some reason the

[00:04:36] Most of the school more so now it's not clear the score on the scoreboard wants first without substitutions already robbed her beat their boats swam or climbed out of the hole slamming three seconds. I understood that the main thing is that our

[00:05:09] The head is not good

[00:05:15] Bandera's all work to bury. For fuck's sake. You see the solution. But in no way did they make it clear

[00:05:27] To what extent am I

[00:05:37] I think and. Somebody is only a villain. And for someone already. And who wants to suffer something there need something useful for themselves everything is already over. I already have a normal country and all there were two monasteries and a shovel all here lubyanka passages watchmen on soccer in the direction. Everything would be fine.

[00:06:35] So tell me what in general there I don't

[00:06:42] Hear you move your groin even [00:06:49] Two

three times a day to this

[00:06:55] Degrees that you've now sunk below the plinth. [00:07:02]

And actually in order to

[00:07:07] Start something I'm hard for you to talk about.

websdr_recording_2022-03-03T13 05 39Z_7060.0kHz.wav

[00:00:02] Actually held. And they don't have an audience for

[00:00:08] The account of entering the temple to them was. What. Ukraine in she forget Ukraine. And what about the factory search or glass. Half of the money in poland defeated Hungary and the courts wrote off the former. Slaves not slaves not slaves.

[00:00:40] Я. Usually they don't want to make money

[00:00:49] Russia they were friends with before Maidan

[00:00:52] Russia and Ukraine are not needed. But. Where to go and the pensions will be two thousand

[00:01:04] Euro and everyone will drive

[00:01:06] To Europe to drink beer with sausages and from America and beer in stadiums.

[00:01:16] What you're telling no grown adults. They're not all still sinning on the weak population already and the blast wave mom already for May explosive left net closed all sorts of windows closed ATMs yet

[00:01:41] They don't give me any. Nothing at all and there and fire. And such examples I. I can hand out automatons to every thousand²⁵ and automatons.

[00:02:01] Well what's being done there, it's just some other person at least would have thought with his brains that he was sitting at home about what he would go to war they went to war we lived

[00:02:15] In a row there's shooting without. The pledge of the family

[00:02:23] Violence. Junkie willing junkie don't want to get stoned. Drug addicts tired eyes such I don't see what so eyes I'm a lot of money ready to dose constantly maiming pay for the parking lot of drug addicts at that time treasurer I probably already paint the hearing and think right as Brezhnev drug addict. Yes yes he is a drug addict yes he uses drugs. That you for such words it is drugs to use do not see how people are intimidated by this world of his here are people what to do.

[00:03:16] What kind of normal can you talk about when I. Gone are the days when you can even do this other thing important that there is a submarine or something like that.

[00:03:43] The last picture that the Russian military killed these civilians is actually not a coincidence that six shelling from the Ukrainian side was recorded by the chairman of the Federation Council of Russia Alexander Bastrykin instructed the Minister of Internal Affairs of the Donetsk people's republic from the Ukrainian armed forces. The same agency in each case is created a living space. The team well. All quotas in Ukraine. Ukraine the kingdom of heaven to you.

[00:04:37] Hod. So in.

[00:04:44] Sea of Russia. You know the Russian language is written in a way that there are no mistakes. Я. In this he was attributed to the forces of the Makarenko kind of wheelchair disabled a.

[00:05:19] I know that

[00:05:21] Silence at first point blows to the head. [00:05:27]

Pity also he's too

[00:05:34] It's good someone is a legend legend when renier was sick here however his here with refugees from donetsk to his berlin in jest authorities are much stronger and chigirin district where i you dynamics of shanxi growth. So it's not any lower than the earth cart

[00:06:01] there was little more than obama caucasus also shouted nawalny at one class there kharkov something else there baths and smaller look

[00:06:23] Things have changed. You have to

understand [00:06:28] That I haven't been around much

these days

[00:06:37] I went while my first actions vanya is not particularly drunk he keeps shouting to me all the time disconnect at kharkov there was a robot beating at kharkov the fool drunk he keeps spinning.

[00:07:02] I already said glory to russia.

[00:07:05] These Nazis.

[00:07:38] Well wives shouted glory to bandera glory to ukraine. And what about shouting at them guys why don't you shout glory to bandera ukraine. Sho so sho there was his message right away dialed it and all the others shouted bandera no longer a hero does not fit our such there glory came from someone for whom the glory of the glory of the nation. The same shouted and shouted as planes as a part of Ukraine

[00:08:22] Russia and Eastern.

[00:08:27] And not one word of his own yet. Glory to russia. They may not shout what they say and the battery died shout heard twice the battery on the side I sleep like a battery twice shouted seva battery

[00:08:46] Pressed the brave were

[00:08:48] On the Maidan to the pot and said busy boys. [00:09:01]

She's very like.

[00:09:02] Russia love like Russians love respectfully America and the greater country listened with bated breath.

[00:09:13] Although he's not by. But I'm not sure that April '17 will mark all the regions. I agree. And even if the situation in the north in the far east of Ukraine they're already halfway there. We have it that way after all. Let's check the question is closed.

[00:09:46] Vladimir Volfovich he said it correctly. The issue is closed from Ukraine. Even vladimir volfovich said the question of Ukraine is closed.

[00:10:05] And. If you have to frankly

[00:10:15] step back a little bit.

[00:10:18] Back in the day. Unfortunately I don't know how it happened.

[00:10:28] I'm concerned about something fragile though.

[00:10:43] That said, changing the team composition so the team. I want each of.

[00:10:59] If they're thinking and thinking if they don't have to they're executing that it's very similar. A real stalemate situation and there are only the children of the big one.

[00:00:00] As for the questions, I told you. [00:00:08] The

old masters their program should

[00:00:15] These are also covered by the tanks. Rob. Be maybe the tanks clap few of them can.

[00:00:31] This is already and

[00:00:34] That and the roof has fallen already the press has fallen on the factory the roof has fallen on the tanks. But the khokhlov of course a long time ago.

[00:00:45] It's already fallen and now it's like

me [00:00:49] It still has fallen

[00:00:53] In the queue the roof rides leisurely well

[00:01:02] And the most strawman of all councils. Also America's fault Obama and his. Just this article.

[00:01:21] A new foreign car came out

[00:01:27] I snapped. Well I'm a scary thing. Scary. An even scarier case was in Kharkov. I'm in his hometown of Odessa.

[00:01:46] Waiting for his family two his whole family go talk fools on

[00:01:55] out all the professionals and the future came out such news wretchedly what do I know about these popularity boats and it appeared in Donbass walks now kharkov haider showed itself ammo lugato lugato clap you will be offered there teenager ammo our beat beat until your question to moskals popularity is over. Hit the walls, hit the walls, hit the walls. Soon the red cross roof itself with straw

[00:02:42] Breaking is long enough as he is always out of town

[00:02:55] And the fool himself is a very powerful Brooklyn away. All you could swallow at once

[00:03:03] To the team this show where about the fan line [00:03:10]

To the team and go all teams these

[00:03:13] My favorite Transnistrians what.

[00:03:17] Kharkiv will not surrender weapons to Kharkiv tomorrow will already be liberated complications. And what do I want to surrender kharkov. Obviously the indications I then come to the studio. I actually worked in charge gathered his gang took here the same banderaids and road kharkov odessa. You want his gang to create an understanding.

[00:03:54] People. Barack Obama recalls himself.

[00:04:03] And where to put them. Everything will be fine, everything will be fine here, everything is under control.

[00:04:12] Me too easily. If any one wins, we'll take it.

[00:04:22] Into the cauldron and they've all got it right in the novel today to go to the beach

[00:04:31] Doesn't she want to give up don't start them up and the rains I beg you to [00:04:38]

Declare otherwise they sucker you will shoot tomorrow desert you will stand [00:04:48] In

February. It can still be added.

[00:04:55] And only destroy. Here's how we need to hold on

[00:05:02] We wanted to conquer russia here and russia wasn't there at all. After which they

[00:05:15] help think they will help them. Now for themselves and for them no one wants to start a war if I know what I think we are all sick sections of nato in europe already gas and oil yes they only then in this end clap enough to be mostly that the colors are flowing.

[00:05:44] I would shut off gas to Europe altogether if I were you

[00:05:48] Bosnian Serbs fuck them here

[00:05:51] And let them sit there freezing and that's it. I haven't been standing for a long time.

[00:06:02] ruble 200250260kop1 vase already. And I even shut the fuck up he then gave me please already everyone ahhed and.

[00:06:22] They had every chance.

[00:06:27] He'll probably say he called me called my wife sergei call tell me about everything yes and then not always this but this phrase all call give us lines of oil and.

He must have told her to fuck off, if the negotiations were over quickly, and then he just called and that was it. I heard it somewhere on the radio or on TV that it was over.

[00:07:07] Negotiating new countries on the way I sent the fuck out live however you want not wait.

websdr_recording_2022-03-03T12 00Z_705047.0kHz.wav

[00:00:00] Apparently the solar ballad miclojo-maclay can lay its battery theater which is already a battery-based battery in russia when its battery without residual battery battery electricity. If you look at it. There the wall beats your claps claps your claps. The combined efforts of the claps of the beach cycling. Fought with the junior national team and became president of the club. Is a politician for you. And I will say yes we are gradually dealing with tax policy to do not really thinks should be declared I chess federation and so on no one gives

[00:01:35] And I'm sitting there and nobody's giving.

[00:01:43] But I hear about the power grab in spain all so echo moscow that no one gives you anything there. All predictions are batteries. If they get up and the battery gave

[00:02:15] The promise of an award winner.

[00:02:20] Who are you guys who you there narcotics defense battery robot. Weak is weak and I want to. Well you have to you know I have to start. But all the same battery not to mention what's going on around mariupol and kharkov just in the last two days has become the dnr and lnr. Everything is normal. Here is one heroine to me at least one night claps seems to be on the side of the dnr. What are all of you there dtp in the basements. This is the most important thing in I always said let me not want surrounded mariupol kharkov zaporozhye. He doubts and goes to the side of the dnr and lnr older cars crying that in this pops the battery date a little bit tanks you have ksyusha came back quite then I go to her house. If there is any track any benefits if it dies then before I start talking to her there because there I see the way of the fields she just beats quietly.

[00:04:27] And to the last

[00:04:32] Rode if always that still at least on the old appointed. This year sticks called Ukraine and Ukrainians still Byelorussians overpass everything. And what is at Kharkov Lviv. All will be stopped, guys. Kharkov city breakdown of its city breakdown of the ussr after it ended returned to the ussr one man dies. Я. And here of course is all the information. And here you can be good without a girl. But all the complaints in the fisa collapse is already impossible to be among this security threat these complaints about the collapse of russia and by. During the Cold War already laid and corruption has fallen and the roof has fallen off. The wreckage of the titanic worlds is more important for business. What you coach was there were tanks and there were robots and everything was hidden.

[00:00:00] That was evident for the first 34 days but after the last personnel problems associated with those tactics when the Russians were trying to minimize the number of casualties we didn't get some very blatantly no such attacks in terms of military tactics. If there was no such order it would have been natural there would have been no such losses. I can see from the last two friends that the orders were such without losses, but nevertheless not to the detriment of the safety of the Russian military. And by the way immediately after receiving such an order the losses have decreased sharply at a fairly serious rate, i.e. there is still progress because objectively speaking we do not yet know very precisely everything that is happening at the fronts. It is clear that the modern war is being waged in a kind of informational fog. Because if you listen to the Ukrainian side, we already have the entire army destroyed, all the tanks are destroyed, all the planes are down, landing ships are burned. But the statement is one thing and the reality is quite another. Is it possible to close the desire to cut the entire grouping of the main Ukrainian fist, which were concentrated in the Donbass. Now it's a little bit of a change in the heat of the moment that the Russian air force is completely and no Ukrainian military threat will be able to leave. And also saw this the first column it was hit. And after that, according to my data, the viewers who are in Kramatorsk Slavyansk, they say that he

communicates with the military my stand the military they receive orders and will stand with him until the end of the year they will be quite difficult considering that at any moment it is possible to strike from the air.

[00:01:51] And the main task that has now bypassed kharkov from the east is to cut off kharkov completely ate and already yesterday it was noticeable that in texas began to get very worried trying or not knowing will try to take out. I really hope they pull out of kharkov. Because they will leave kharkov very quickly. The military are only fighting because they are standing behind their backs and they understand that this will not happen. Either they will try to negotiate with the Russians then they will just be in place. I'd really like that, but I'm afraid it's not going to happen. Tom say literally three cars in fact for flashers now buttons with flashers clap pathetic and very pathetic and all the more ridiculous everyone. Russia has never started a war before. And when you could gather more people a 7 5 6 7 10 yalta. Especially with martial law, it doesn't help anyone. We act in accordance with the article. Why is it helping you to evaluate the special operation. I tell you once again including honestly even though I am a Soviet man I am a citizen of the Soviet Union and you as all guarantees as I myself it is absolutely no way this lawlessness that did all itself nice when not surrendered khohol podstilka American.

[00:04:14] I want to convert I feel

[00:04:17] That left itself a communist party a few judges and from me especially after the governors approval fuck me up.

[00:04:33] The business got even more teeth than before.

[00:04:38] Social later you and supplied the data and by the fields and by the fields gave claps to the nice girl. Aha I reassured you where the costs of our new product we ask but we get by. But even and about how there and what was when I was much younger reported.

websdr_recording_2022-03-03T12 53Z_706034.0kHz.wav

[00:00:09] Our defense guys understand that will step back trying to reason with people and throughout the spring I wanted to do everything from the area where I'm not going to do lessons. Accordingly the local guys I'm not going to this is a red card understand and you've been persuaded. So when the order came to me and we were 36 kilometers from the Russian border and I had everything with me yesterday as soon as the order came, it was time not to leave. Although we guys haven't failed us yet and what kind of development is going on and what kind of expectations we have. While waiting for all these somewhat different military operation will probably turn out that there will not be that in Iraq went to attack his team. And he needs as much blood as possible more destruction by the loss of bridges explosions that occur not only during the capture of the building but also immoral it makes absolutely no sense. And the fact that it is just the bourgeoisie that

[00:01:37] I repeat today all Ukrainian troops are covering up civilians. This leads to bombings. But you can see that

[00:01:45] What's going on in Kharkov. If in fact those who are densely settled by the Russians would not have started this. They're deliberately making it all happen so that they leave ruins in their wake. They have already buried Ukraine for themselves for good. They are ready to kill not prevented, but those who are left they have a team to develop everything as much as possible. In I told him but all this I praise much more important

[00:02:22] For Ukraine for

[00:02:27] We're very important balance in a number of European Union countries. But when we started to study. That is understand when on the ship there is you and the Russian actor who wants to save not only Ukraine but also in russia and see what is done on the brother look at kiev has

[00:03:09] International organizations and the army got new rules

[00:03:18] European territory of the soviet union. Graduated from the director's department of VGIK. Wishing to leave mariupol as much as scary and some scary playing that one gives the command to watch the fights. All those with anger and absolutely. Electronic security in connection with this status as you know I have never been acquainted with a foreigner by the way. I do not want to take his words so interpreted I understood that they do not have it at all they in russia for we have stopped trading with it because of this they our russians about it took back not returned to themselves does not think and do not know. There is a possibility that we did not know that when the government is in power, hardly anyone likes it. But it is good to expect tomorrow the day after tomorrow but not. Expected.

[00:04:48] Voronin thought he would have to wait.

[00:04:55] What's more in my opinion I wouldn't call it a primary target. That the feeling is that we are fighting just somehow very carefully. That is trying to minimize casualties as much as possible often their own lives are threatened.

websdr_recording_2022-03-03T12 20Z_706029.0kHz.wav

[00:00:00] Okay thank you. Good health related to this reception. Thank you all. The most important thing is not to have a heartache. I'll answer for everyone at the reception. And I call the center out loud. Good afternoon, Vyacheslav. Here you can bet everyone on command tells you how they are arming you. In this situation, it is obvious that it is no longer coming. They are only needed to keep you playing. In their place.

[00:00:39] I showed up for the commercial and right after that who should.

[00:00:44] of the Donetsk people's republic willingness to blow up a school laid. In Kiev, Kharkiv, Sumy, Odessa, Mariupol, and in at least two dozen other major population centers, the Nazis are blockading tens of thousands of Ukrainian citizens. It is to blame for the disastrous state of affairs that is taking place practically all over Ukraine, where just about the prohibited methods of warfare and violations of international law are taking place. Thus, there is practically a situation in Ukraine

[00:01:32] Humanitarian disaster by.

[00:01:39] And there was a message from representatives of the Ukrainian delegation who are going to the negotiations for what purpose is a huge big question. That's the minimum program. Humanitarian corridors corridors corridors further on circumstances. I want to generally understand the humanitarian corridors that we all know about which officially the Ministry of Defense and the representatives themselves are constantly talking and doing some kind of humanitarian corridors on which the Minister in what we about this details in the same Mariupol in the city of Mariupol detained 72 who followed a humanitarian corridor open. We have already been pressed by some let's have a good day. Happy holiday with motivation be well. I have decided completely. I did not press I did not with this incident so happened and asked where else he kind of took it. No I don't switch anything around the way it is. That is why I do not know how many people have so many opinions and Alexander Vassilievich, good health and nice to meet you again I read the CbR and for the third time.

[00:03:06] Sunday took place. It's easier for soccer players so far.

[00:03:13] This is still local especially Orlova1520. for example. Faculty time. I don't go to that often, but very often I go there too, I go to the head of the bench, but not much lately now I work with them for example I would say that I don't like it said the soldier.

[00:03:44] Because I enjoy life the same way

[00:03:50] How's the health of yourself. It's been like this for a few years. I haven't heard, I haven't heard, it doesn't fucking work. I myself have been a neighbor for a long time since the early days. Of course that such things are alive healthy but it's okay now for example where did he go from where he went to change the microphone. Years of time is 1520 normal of 15 course. Observed. Only I came what there now turns out Victor Alexandrovich was invited now by accident probably you honestly as you have and now do not pump the fuck out who else was called. Roman hustle Kostya only three people Fedor reception Tatiana my task now is not so Mikhail Misha right. No. You listen to me, please. So then it will prompt someone to do things while the microphone. Roman, you're Kostya Fedor, I salute Misha. Admittedly Mikhail Gorbachev said all players describing the meeting as Boris Kilowatt will have to so A-plus all is also great all cancellation less fatigue from the reception at what place in the old town reception waited until. 7:3. And also Herman.

nikolai approximately. And that's why it's a good signal or praise like that. Nikolai hello. Good day Alexander near Voronezh. Leonid Nikolayevich a long time ago in December 17 communicated and that's it. Out of 700 46,700 I. Here I have eyesight still though in glasses is clear but the cancellation signal such reception. Three pilots with Pavel. Thank you, Nicholas, more often I have come to you people with a lot of good health and here I have a friend came, but what has happened in the relationship with the FNPR. Pavel good day again. Roman se dima kharitonov pavel roman luba vsevolod3 pavel good afternoon.

[00:07:06] In St. Petersburg, for7 example.

[00:07:15] Thanks buddy ps you yourself all cancellation quality pavlov and victoria yes and everything is great. The signal is good everything is amazing all your like everyone's reception. Aha it is understandable just wide working look no already sold the loan repaid now 780 sneak and mill is nice. Yes everything is fine all beautiful all short you 5 plus 10 accept what is nice eternal question put finally virtual money I will be able to accept. On Monday night he was fired from his job on Monday night only on account of the identification has taken legal effect. If you buy a product, you should not buy clothes and go out. But the most interesting thing

[00:08:29] That it's still a long way off.

[00:08:37] Not the first Ukrainian. So you're saying there's no such thing.

websdr_recording_2022-03-03T12 26Z_710720.0kHz.wav

[00:00:00] That's the kind of finale this microphone had though he kept the score it's eighth clear. So we have to add more and how much more I don't know. Yeah okay I think I can do the interview now. Happy upcoming women's day. So the female half of the holiday holy throne flowers or whatever will be there or there will be a clearing and the reception is always. Why do I. But I think that if and from God. Is there such a thing. Talking a little bit away for example in front of the microphone. It's just talking talking talking.

[00:00:55] I fall of the year2010 now say at probably13 now the 520eleventh hour at 14 meters match fire. The weather is good no wind especially for all the snow I promise now no precipitation yet. Plus one degree of tension.

[00:01:23] It's called. And what a time it was now to think about good work and now let's make an A. Can we do a three right away now. Here it is a three and as for the three, I think that right away not to twitch. It's nice to go out there. There's no such thing in Kharkov for a long time, but here it was such a mess. There I begin to say she begins to understand such things normally now dial kharkov could not, but it is now a normal desire is present. And maybe it's my fan a little bit can come from there. No it's not, it's just the signal itself, the switch itself feels a little away just a little bit like a microphone a little bit in

side. I generally drive about half a meter or maybe eighty centimeters there, and in this position, but underneath the wrap, it's there and it doesn't go anywhere. It doesn't go anywhere for you. And then where does this distance come from when someone was handing out under when. Yes yes it is present. This is a story about the last stage of terms. Now it's okay to say here that

[00:02:59] It turned out to be a vertical elongated such and short business but I didn't have room here. So spend it like that. Moved to more such a triangle hung. We're out of leather. Here's the deal. Roman center 4 igor dmitriev. 4. Fedor how is it with you there in the morning it snowed very soon will be zero maybe +1. What do you have there with the weather right. But it's cloudy here. No sunshine. It snowed this morning. True, a little was at the Zaporozhets now put everything on zero can change. Probably somewhere zero maybe about plus one. Somehow at night the frost is cool too. It's all about the fact that we have sunshine. I think it was sunny yesterday I don't remember what it was. All right, let me go read it and I'll show it to someone else. Good to hear from you. 73 Goodbye, Muratova.

[00:04:27] That's the distance between you.

[00:04:31] Thank you. It was good to hear from you. Goodbye. There was everyone who said terminator fyodor4's guys at the radio.

[00:04:42] It is believed that she is for these very. You. Chronology. 38 you know I thought the goal was tamara and already. Elena komarova marshal trefilova fyodor smolov was born today. I salute. [00:06:08] Myself. Actually, winter ends in April. I was watching the show yesterday or listening to it, I don't remember, but April is the beginning of April when winter comes back. Something like that. Thank you for that the only company you have on you goodbye

[00:06:25] Even in February it's not winter at all. Then I say that then as now we go out in the vegetable gardens all of May and they all like to start beating frost. So it better be a laugh now it will all go well girl all kind of and goodbye.

[00:06:45] I also looked into that guys there water had arrived. Somebody had something on the bottom so that's how it is. So still let them dig for now with the holiday.

[00:06:58] Okay thanks for the boots.

[00:07:00] I'm this still Karamzin nikolai at everyone's reception. I don't know at all. They don't know very well. Alexei alekseyevich good afternoon I'm also more. I hope alexander is in Voronezh

[00:02:50] The national team is what's called different from the Ukrainian propaganda

[00:02:53] Which tells terrible things about Russian soldiers

[00:02:59] Another day 33probably too4 now8106 it's come to three four that there young and with such confidence in the overall truth there's no fog.

[00:03:15] At the reception. Rather a little bit not even a little bit.

[00:03:33] Drove to your white collection in the suburbs and there I have in konstantinovka. My mother became with these ways was going. Roma plane towards Volgograd not reaching Volgograd you go to the right there are such local roads. So but the city has not seen. I do not know what to thank you very much. I wish you good health, and most important, do not get sick. Goodbye.

[00:04:13] Have a good day. I think that. What. I'm asking now.

[00:05:08] But it's also very different and ours here. Thank you. One cue from the top of the team. [00:05:41] G. And I.

[00:06:05] I hope he said I'm very

[00:06:12] Very. But that's all at times even. And they will love it.

[00:06:51] Maybe Maykop also invites someone. Roman Vasily 6 and Igor from Samara for example. 6. Tamara center good evening. Day. There are three more. We hope that such only nine plus 15albert kupriyanov.

[00:07:29] Yura brought me. I understand but at the end of the show.

[00:07:46] Commands like this for example.

[00:07:54] Turned out veterans which is very little.

[00:08:02] And at night I went and talked to my colleagues on. It was fast enough.

websdr_recording_2022-03-03T11 03Z_706036.0kHz.wav

[00:00:00] Who are they. It's like in Donetsk they came. We're not going to think forgot yes forgot. The thing is that once upon a time. President Poroshenko said that their children in Donetsk in the basement she the same year to school. It was not planned.

[00:00:21] What's the most about this case.

[00:00:22] When a parade of leading scumbags walked through the city of Kiev carrying portraits of Adolf Hitler. You didn't notice that and you even applauded it. That you promised the possibility of a strike on these very Russian cities and where were you these wonderful speakers. Alliance for Voronezh and remember that your nationalists came to the first Chechen war in the early 90s and slaughtered, tortured and killed Russian conscripts. Remember. All for what they gave you this country and you turned it into a NATO base. For this. That's right. And what about us? I wonder how Zelensky began to film everything himself yesterday and started remembering that we are together. How come we fought together in the battle for the Dnieper river, defending it together while freeing Kyiv?

[00:01:24] And for the holiday.

[00:01:28] Michael that is all there is now enough of everything. Now it is clear that these different nationalists and Bandera activists alone are not enough. Somebody else remembers the Great Patriotic War, so come on, everybody, we are together, and they appeal to the Russian people. We fought the great patriotic war together. Why didn't you mention this a week ago? There were people with Nazi flags marching right under the windows of your administration in Nizhny Novgorod. For some reason.

No one knew what they wanted back then. Came to the trenches. By which a bundle develops. Slavic peoples really two people have been telling for 20 years that we are Mordva that we are the Horde we are generally a threat to the Finns that the Mongol Tartars are not. Change it. You know about all this, let's wake up. And all these measures were right. We are not even Slavs. You are a real Russian. No we are not. Or. Well, what for us. We are Slavs. Bratva is exactly the fifth and tenth. And recently they were saying that we are two different peoples and Europeans, and that's when the mayor. That's what you want for us. By the way, they are launching another project, the Russians are going to destroy Kyiv's Sofia.

[00:03:04] You let's bash the very orthodox people that they've been kicking around like they've been taking their temples away from them killing priests. Here I am in this religious subject better. Are you aware that back in the 90s and noughties were killed dozens of priests of the Russian Orthodox Church of the Moscow Patriarchate were killed for nothing, killed by nationalists and uniats dissenters. And they took away dozens of churches from the Russian Orthodox Church, or rather the Ukrainian Orthodox Church of the Moscow Patriarchate. It was under Kravchuk under Kuchma under Yushchenko under Yanukovich and even more so under Poroshenko. Kiev continued to do it, and now we Orthodox. We are all these evil Russians now come and want to bomb Kiev's Sofia. Let's say if anything happens to these churches in Kiev, it will be neo-Nazis, most of whom are not at all pagans. People are not Orthodox at all and they say so themselves. You don't know. Look back at these videos, they were checking and checking and checking with these people. But if anyone did it, it was just them. Action against ATMs and buses. God willing. Management of the soviet state program wood house development as expected in the future said hokhlov first

[00:05:05] Steps of years program thousands of 100 wooden houses await their future owners fulfillment

[00:05:13] A total of 100,000 wooden houses programs are waiting for their future owners hohl chopped themselves sharp action coffins. In the year 2007 as expected. The future masters of the hohols.

[00:00:01] For all of World War II, the struggle for supplies [00:00:11] Not

interesting yet.

[00:00:13] Humanity is evolving all literally all of us now realize that

[00:00:18] Even if we were like that, we fought the battles for the Dnieper together. We together defended different holidays. Now because now it's clear that only these small nationalists Bandera are not enough. They want to, but still

Who's there it is. Who else remembers the great patriotic war, let's all come here together. I promise you, we were together in the Great Patriotic War. Why didn't you mention it a week ago? But at the same time right under the windows of your administration people were marching with Nazi flags that they buried over which there was a swastika. Why then it was not remembered then and now they do not talk about it. There, too, in these factories and Ukrainian. But we did not expect two Slavic nations at once. And for 20 years we have been told that we are Borman, that we are the Horde, that we are not Mongolian Tartars, are we not. You know a lot of people remember this, let's try. And what do you know about. We are not Slavs at all. You are real no you did not say.

[00:01:42] Well that's understandable. We're Slavs, bro, explain.

[00:01:48] Not long ago you were saying that we're two different people and Europeans we are. How many times do you feel like it.

[00:02:02] Assuming that the Russians are going to destroy. Orthodox in.

[00:02:12] Who are blamed. Discredited churches murdered priests to make a religious theme. So in the 90s if almost six dozen priests of the Russian Orthodox Church of the Moscow Patriarchate were murdered for nothing. This is nationalism for example worshippers.

[00:02:34] Staley kind of. The Russians have to answer.

[00:02:38] Ukraine of the Ukrainian Orthodox Church of the Moscow Patriarchate. Dozens of churches were under Kuchma under Yushchenko under Yanukovich and even more so under Poroshenko. Now we are Orthodox. We all are. Now we are all physicists. Of course, if anything happens in Kiev, for example.

[00:03:02] This will be done by neo-Nazis most of whom are losers in general. Orthodox Christians about this

[00:03:11] They say you don't know. Look back at how they left.

[00:03:17] For. Even. O on died a lot but on. If one of the leaders of the united opposition. And you know, I was trying to explain this is superimposed on. Now it turns out when you're on the Internet. There is such a good one. Я. Gattuso. I can explain why in reasoning. This. And we hope that the cabinet. You can't. I have seen. However. Says forbidden. For example. If events in Russia. In doing so, I have the help of American workers.

[00:05:41] It seems like we have it every step of the way here. I'll tell you even worse. The next thing is done right. Hopefully it will be brought to fruition.

[00:05:54] All the way to the end for that end that will allow them to get a look in their eyes

[00:00:00] So I think it's very important right now that a delicate balance when we're doing a good thing so that we don't break through at a time when a humanitarian operation like us might erupt. Why we're actually already noticing more and more now we're talking about corridors. But what else can we say, dear friends, is this event. It has pretty much already unmasked people. I think. And we have to make sure that delay is deadly. It's a very important delicate balance right now when we're doing a good thing so that we don't miss the moment when a humanitarian operation like ours can erupt.

Why do we actually talk about corridors more and more now. What else can we say, dear friends, about this event. It has already taken the mask of the people who at one time acted as guarantors and in 2014 the situation in Kiev and now I am talking about Germany. Well you know the year you 2014signed Samara and immediately all these German guarantors disappeared. Germany for a long time did not respond to requests to give weapons. They say well we are guarantors and we are trying to guarantee a peaceful outcome of the crisis in Donbass. Now Germany has thrown off its mask. Now Germany not only supplies 5,000 helmets, crematoria, hospitals, but it also supplies man-portable anti-aircraft missile systems. This is quite a serious weapon. I remember when the tenders appeared in Afghanistan and when you had to change the tactics of our aviation very seriously when we had to climb to a much higher altitude in order to hit the Bushmans why

They are doing it quite understandably we now own the air understandably who owns the air has a better chance. That is why they are now going to the West with their arms outstretched in circles to beg for airborne missiles, and a terrible statement was made there. The chancellor of Germany said that Berlin will not prevent those who want to go to war in Ukraine, that is to fight the Russians in the near future the Germans will come, it sounds like some kind of hell and nightmare we have to interrupt and then immediately continue in a minute we will be back.

[00:02:51] I wanted to ask this question. Davydenko proved it. The long-awaited premiere. I don't want yours. And I hope that later before sochi the russian federation of soccer should.

[00:03:34] Rubtsov wide metal case. So they don't heat a damn thing I remember the first turn or did the computer version of a big 120. No matter how good the smell of heat goes all overlapped it's all bullshit at the reception. I see. [00:00:00] Once again, thank you very much at your disposal for her statement from the press secretary of the Khamovnichesky Court in Moscow that Ukraine is alternately dragging its feet. And in the evening the delegation was there waiting for the Ukrainian negotiators and in the evening waiting for them at night waiting for them in the morning waiting for us. Frankly speaking, these negotiations have not started quietly until now. The Ukrainian negotiators are clearly in no hurry, but let's hope that they still give place today, the main thing is the fact that the meeting took place on the acceptance by the Belarusian side of these conditions at the talks there is an opportunity for direct direct direct communication and the main thing is the communication. The main thing, of course, is the content of the negotiations, but as we have already said it all should not be a subject for public discussion. No, the Kremlin believes that the country is simply dragging its feet. And we have reason to believe that the brotherly country is in no hurry to

negotiations is almost always a disaster. I have repeatedly participated in combat operations first as an officer in the airborne troops commander of the omon command in various hot spots children on the enemy side so let's call one and the same and coordinators of the american countries of the west. What it is today. This is definitely with the second I mean the enemy so let's call it easier. Of course the use of human shields of the population is a negotiation process when they are already being pushed through the border.

The third point is of course the pressure from the leaders of the Western countries. We are all witnesses to the macro Israel Erdogan will not hopefully live positively assess the role of Turkey correctly he said that Iraq who bombed the civilians were exposed to it. Of course this is also impossible from donbass ran back over. Another gift to himself he.

[00:02:39] Before the years15

[00:02:40] Experience is very important the law is relevant because the sanctions bill is a negotiation process. They're clearly stalling why they're stalling. Once again I say regrouping forces and means once the year went on food ammunition. I would not say that ammunition is not delivered. Ammunition is being brought for sure. That's the next point. Of course, once again I say to make there strong points created not as in the city. They understand that our equipment will not go there because it will be burned. Our troops will go in some way. Right now there is a battle on the approaches to the city, we are responding, but the first important thing is to save the lives of civilians. The first thing that makes it difficult is to work as they say surgical strikes. The next point.

At the same time, we understand that it is necessary to save the lives of our troops who are performing tasks there. This too is indisputable. And, of course, to carry out the task of carrying out the task of carrying out five bombing raids on Grozny and taking it from all directions is straining, then in one second bang and the city is taken. All of the fighters they turned in for analysis of how it is technically done. Looking at Mariupol the situation is totally incomprehensible, it seems hopeless once again. The third day of the blockade of the city of the boiler faced. And it is possible to go into this now and negotiations we went into negotiations we understand the signals of the world community that Russia is ready to negotiate. Russia is doing everything it can to ensure the lives of civilians. And today the Prime Minister of India appealed to the President of our country, not to Yavlinsky, to assist in the withdrawal of Indian citizens. And here also we must now one of the main things in my opinion can be I teeth the subject of negotiations is humanitarian corridors is the exit of the civilians of all the blockaded territories of the cities that our army. That's what sanctions are most important. Why sanctions were imposed. Comrades I would like to point out once again how much the countries of the West are going to get excited. They do not understand that the country of Russia has stood its ground today and continues to stand its ground as far as they are concerned.

[00:05:20] And the sheer number of them that they have, they threw everything into the fight so easily. That's why this is the sanctions situation. Tomorrow will still directly take some measures to support the population of our country like this. Dear friends, our president of Ukraine. The words of reparation and counter-attribution are sounding. Probably the Donbass has a full right in due course I hope that some day reparation will come to the Donbass. Wounded torn and bloody ruined he will claim. The claims are first and foremost against the president of Ukraine himself. Yes of course I agree that the Ukrainians are brazenly dragging out the negotiations, it's quite obvious. That we do not like it in Gomel or in Belovezhskaya Pushcha. Well, there is another place that is very symbolic and very suitable for negotiations. This is the outskirts of Berlin Karloff Court, where Marshal Zhukov accepted the surrender of the German side. There's not much need for warriors. Yes of course I agree. The argument is the Muslims are releasing money and everyone is praying, but I think things will get better in the near future. The pressure will be 5 to 10 to 20 percent this is one dynamic of this operation, the other is the encirclement of large settlements. And there are questions here that have no answer yet. Perhaps the general staff at the Ministry of Defense knows this. Threats, but it's all a play on the notion of a multi-million dollar city. Yes, we can open cities as we can imagine when a convoy of millions of residents leave Kyiv is a strange question. I'm not saying it's the hardest thing for us during the operation. There is no balance that there is no humanitarian. Because doing a good deed with one hand we are running operations and providing a peacekeeping operation. We go with one hand with a machine gun and the other with bread. That's the uniqueness of it.

Speaker1: [00:01:31] To me. There's no question, for example. The more will exacerbate division and confrontation. We urge the relevant parties not to infringe on the legitimate rights and interests of china and other countries to resolve issues and relations with russia. But if the so-called European I am not talking about America will give up on them. Absolutely a small share of consumers as you estimate. I would like to reiterate that we are strongly opposed to any illegal unilateral sanctions. Sanctions are never a principled and effective way to solve an issue, but only

will bring serious difficulties to the economy and the livelihood of the population. Accordingly, they will be further exacerbated by division and confrontation. We urge the parties concerned not to infringe on the legitimate rights and interests of china and others in resolving the Ukrainian issue of their relations with russia. And russia will continue normal trade cooperation in a spirit of mutual respect and persistence. That let's listen to the order of the Speaker of the Ministry of Foreign Affairs of Turkey here too we should not have any illusions supplied the very radars that we are now destroying on the territory of Ukraine and yet turkey officially refuses the anti-russian sanctions because this madness will rather hard to continue in the first place correct any other occupied cities. This is not the answer.

Ribery closes Michel. In addition, there must be a country capable of negotiating with the coach will not talk about peace we do not plan to impose sanctions. My personal attitude moyseenko but now I do not hear anything. Well thank you thank you all very well goodbye. radio 73movie answers mikhail the reception.

Speaker1: [00:03:40] Elena Vasilyevna hi. Yes there were also volodya hello the wonderful plus 20 volodya red soloist rodion committed to our family smolin volodya 20 volodya reception vladimir red chairs behind us. Of course it's nice to have a good day out. But after a week from latvia thank you good health professor and nurse. Thank you thank you. I remember we had a woman and a half when I came back from the army in '69. We had a Tatar who had many children from my platoon and so on. And he bred the flour for these one and a half. All such thanks to the combine, but everywhere they bred their crusts. And we had a cuckoo from the plant was a metallurgical plant. And in short, he was drunk, we were not then. I was pushing a man in the car for a day, but the win picked him up, the whole crowd. He managed to slow down, she cuckoo was walking from the martin on purpose. And her rival on the podium and Uncle Sashka. He was a Tatar himself. But he came and worked in her offices, the only one on the island without fear here. But judge for yourself. By the people's council at the convention, which comes out to the finish line do it go to retirement.

It was such a song. I remember it well. Thank you you need health. Then while let's show cars about specific corporations the question is why was this performance necessary. And I'll tell you the answer is advertising integration. After all, it has written on it and on top of the numbers this symbolism of an American company that makes tactical clothing.

Speaker1: [00:05:53] Kosovo integration can be found out at this point in time before another during the war man is advertising a brand of American clothes and shoes. Normal yes but when the next chance will be unknown. Now the question about the mercenaries from the tenders is the more I follow all this the more I have the feeling that all this is already previously bookmarked in the words. Perhaps these tenders there were already their just now specialize. Perhaps some of those significant mercenaries that 16 thousand suddenly appeared out of thin air somewhere maybe they were there and now they are just trying to enter the conditionally legal field. We shouldn't be surprised that the West was preparing for this. The information comes in that russia is actually he declared a strike. The strike was being prepared on that side. They so I guess we will continue to have an opportunity for all this time.

to establish relations with Belarus back our special correspondent Anastasia Sokolovskaya is on the line. Nastya hello, we are waiting for negotiations, what is going on some kind of a community line, especially the most recent data, as if Ukraine is still changing the delegation. Yes again good afternoon. But what has become clear is that the Russian side has confirmed that the negotiations will be held, as before, in Belovezhskaya Pushcha, as established and agreed in advance, Vladimir Medinsky, the head of our delegation, has been very calm and tried to reassure the press

[00:07:32] And the press and.

Speaker1: [00:07:43] When I came here we came to the talks again good afternoon what has become clear exactly confirmed is the Russian side has confirmed that the head of our delegation Vladimir Medinsky will still hold the talks they are still here most of the offices of some but the ground in front of us. But I and the head of the delegation worries as much as possible and the press and told you that they are in contact with the Ukrainian side. They are quietly he himself used that word that numbers15. Perhaps earlier, but perhaps not earlier, and so now the start of negotiations is scheduled for 3 p.m. In the north of the Donetsk region here in the area of Belovezhskaya Pushcha, the wall has disappeared. Our diplomats at the negotiating table to reconcile positions on all the points on which the negotiations will continue. Vladimir Vishnevsky called it the military-technical aspect of the humanitarian international and political now in their position another hour and a half before the start of the negotiations to go over it all again quote no time wasted we are waiting for the Ukrainian side. As for the composition of the Ukrainian delegation, we have also seen these reports, and they refer to unnamed sources. So far nothing is clear about the composition of the Ukrainian delegation. We will keep you informed. Thank you.

Anastasia Stakhovsky on the direct link Belarus for two months let's say how many of our speeches were new cars with diplomatic plates. It should be understood that it is not the Ukrainian delegation is still on the territory of Poland. Allegedly what.

Speaker1: [00:00:01] The propaganda we are forced to believe is a lie insulting the history of Russia and Ukraine to the memory of our ancestors who fought side by side against Nazism. In fact, my first channel. We are not Americans who came from Afghanistan destroying civilians. That is our advantage. Unfortunately the west continues to accept the terms of the cold war old enough let's say the leadership of america continues to assume that they can dictate terms to the whole world. Wait a minute, they gave us a very important signal yesterday, just as Obama said it is the ideology of self-preservation and it is the memory of the past that makes them realize that a nuclear war would be a terrible crisis for the whole world where you can't win. This phrase is very correct because this realization comes to our Western colleagues it is very well organized.

But it is more likely to fall into this abyss. Russia will continue this operation until the goals are achieved regardless of what our colleagues and everyone else who comes and goes think. Today we can talk about the leaders leaving for Europe where elections are coming up and of course we have to focus on everyone, but everything ends tomorrow and they can continue to think that they are in the center of the world by creating this kind of decree that is impossible in principle to exclude from the Council of the Soviet Union. But they won't succeed, it's obvious from our actions and inaction in Ukraine, it's obvious from the point of view that Russia is bringing peace. We are inevitable as a collapse especially of the ordinary people of Russia who do not have a Frank Lampard yacht, we will survive somehow. I suggest we don't engage in legislation.

[00:02:22] Of course I know a huge

[00:00:23] Related.

Speaker1: [00:00:28] M. Mgb. Campbell. No the call sign is obsolete. But we didn't meet much under that call sign. Momentarily. Thank you.

[00:00:58] Both of them by luck. I'm all.

Speaker1: [00:01:13] Agreed. Я. It's a pointless thing to look for. [00:01:36] Right. But this. I'm afraid that.

Speaker1: [00:01:44] The target is waiting for us says Marina. 4. Peanut 7 118. For example. That and said nothing ran away. I respect me so as if I was working on this frequency on a general basis. Now I will be backtracking to go into town, so that's something like this five-nine plus two. Sergei from Saratov I saw this plus years 10dynamo compared to also young. For me mom

[00:02:36] What's out there.

Speaker1: [00:02:40] So I'm a foreigner but I'm really not upset I was left with zero and because you also had 190 million taken away yesterday yes 7 118 we are afraid to be afraid well thank you I found yes my lunch is over I will choose to give work and success thank you very much said. I will also explain the situation

[00:03:12] And the next three years have to count. But.

Speaker1: [00:03:22] Your Boris and Elena. 4. Fedor fyodorov yelena reception. And fyodor fyodorovich elena yes and is it possible to receive today most

Speaker2: [00:03:39] Capable Ukrainian units and battalions which are staffed by Ukrainian nationalists who are known to be most determinedly uncompromising literally to wage an armed struggle

Speaker1: [00:03:55] To the last drop of blood. And here is the elimination

Speaker2: [00:03:58] Here's this grouping, as it seems to me again, it will largely allow to turn the character of the armed struggle in the special military

Speaker1: [00:04:06] Operations. Mikhail Mikhailovich this fact that our army has already reached the region of Kiev, as evidenced by the local ring

Speaker2: [00:04:16] It's getting harder around the Ukrainian capital

Speaker1: [00:04:19] Every day. And by and large, in fact.

Speaker2: [00:04:22] One of the goals of the special military operation but we have every reason to believe was to take control of the Ukrainian capital. And I believe that this goal has not been set aside but is still being pursued by units and formations of the Russian army. And apparently this plan is going to be implemented

Speaker1: [00:04:42] In life at the time, correspondents who work on the front lines right now are reporting that street battles have started in the streets of Mariupol, that is, in the city, at any rate, this is happening on the outskirts of the city to be clear in the city itself is blocked according to information from Eduard Basurin he reported on our broadcast about 400 thousand people and also I remind you that there are also foreign nationals Indian students. In this regard, Putin on the eve of the Prime Minister of India in the Ukrainian language Modi asked Putin to assist in the evacuation of Indian citizens from the territory of Ukraine, but also Denis Pushilin in our broadcast only reported that the Russian Federation is ready to provide a humanitarian corridor. She is already saying that a humanitarian corridor for civilians to leave Mariupol where people will be safely delivered to the territory of the Russian Federation once again to make it clear to the citizens of Ukraine we are ready to meet on the territory of the Russian Federation to guarantee safety. Putin's talks and phone information have already emerged so far no details. I remind you that the Russian-Ukrainian talks are supposed to take place today in the pre-election reel is the Brest region where it is not known yet. This is quite a scandalous statement madonna let us listen to so that it is clear from what follows that the political machine is not being driven to and the war itself between nato and the west on one side and on the other in ukraine is not. Russia is under attack, it is the aggressor.

We met and talked. Airport because while the hero of the novel by Petrovich Galina its in Borispol becomes the most important. To write down his wishes radio communication told Dmitry tamara zsd. This25. I receive you a beautiful signal. Russia undoubtedly what technique works but it feels very good golden mountains yura there was a second microphone yes there is a difference. The first microphone appeared we second not a bad microphone nothing wrong with it but a preference I also. Number one cavalier. The old school. Reception. Great great great. I've been around 65since 57the year I was born65. But I retired in time. It was exactly years60 old. I didn't have time to have this law yet, it didn't add anything to me. But I had a heart attack six months before I left. That's all.

How much of this stuff will last. There were a couple of vessels cleaned, it's just a small thing. Two stands were put there all is good as not to jinx of course so far seems to live well. But I used to work here before I retired and I used to stay here. I used to work here with my boss and my boss and I worked together and left. When they started opening companies and he became chairman, then I retired. He was sitting in my yard, but why are you walking around?

Speaker1: [00:10:20] Well of course I told him right off the bat I need this one here, no questions asked. And here I am in the office here alone equipped and here's how I have no problems here in principle well I won't quarrel with him everything will be fine I think. So that's the way it is with the accounting department, the boss is close by. Anyway, I'm out of the way here. About a hundred meters away from them, I put up a mat. And slowly so dashingly so that's how it is, friends. All right, thank you, thank you. Be well and cheer up. Happy holidays with the masses. Have a peaceful sky over your head. I don't think there should be a war anyway. But it should be decided somehow, because I'm already hearing things like negotiations to insist that both ours and theirs stop this war. But I do not understand what the word "stopping" means. They stopped this war once already. What did it come to again. So I think we had to finish with them for good or to make them speak Russian and finish them off. All right, well, let's not do this politics, I don't think we need to do this endlessly. Thank you, my friends, and cheers. Bye bye.

[00:11:54] Let's go back to the territory of modern directorial cameramen. The greatest hope of all.

Speaker1: [00:09:29] I don't know, I always think there probably won't be much of a difference. It somehow works the way it's set up. But it's right if there's completely different microphones absolutely and if there's some tablets around here that know how to measure their impedance by whatever it is. The difference won't be much of a difference if you're not really a musician, as they say your ear is there. So I think if you put an electrician or something else in March, it's different. But then there will be a difference. But everything is clear and beautiful. There is absolutely no problem. It's great that you have +2 weather there, it was snowing and now it's snowing +2. And all this leaks from the roof and the snow as if the cars on the road was covered with dirt, but of course made mud. This is the weather on the case taken and on the reception. Speaker1: [00:00:00] He can't have a third operation, he doesn't have one. No he didn't have one I'm not arguing he didn't have one. There was what's called history history it's not just a short title if for a reason. A very correct man like that but he doesn't have that vague style sometimes either. But it looks in that sense astahova interesting. I never said anything about such a successor. Usually on the board of the federation all the issues are familiar all in advance. So this kind of talk, he's got himself. I haven't crossed paths with him for a long time with alexei he has no live in the army. But all right you're glad. 87. I have everything on the years. He's at my dacha now, I have punishment there. I worked with him in this row and the sun on 80. How about that the antenna is 6 meters high and the Italian triangle. So it's okay. I did. And on that state as a good worthy successor reliable. Yesterday. I did not sell anything I bought anything except 399 and I already did not want to part with it. But listened to 1000 of his comrade. He sold his first successor.

Speaker2: [00:01:59] We have glasses on our British diplomas. What I want to say a little bit underneath you then you have a little bit of a distortion in the VF that is walking somewhere on the tiles then the tiles a little bit of an approximation on the cheeks of the signal happens here a little bit this is present but it is not he said just for information a little bit of this distortion a little bit there. Speaker1: [00:11:27] North Butovo go to metro. Dimitriy Donskoy. So that's the kind of thing. And it's great great great great 7 6 10. Magnificent is the new hardware but new bought it before. How much did you get it for? And it's a hurricane gone in May. A year ago they also great great well yashchenko yaroshenko learned or not.

For example I really like soccer I was sold a kilowatt of it, but the amount and hard to plant in winter in Moscow. In the summer at the cottage, I therefore added to it a very good reinforcement. I even think about it. Of course of course. Dymarsky is a good healer. All our expensive it's all impossible now. That is why yesterday I said yesterday that I had to add 50 bulbs to my rostrum. One at the cottage for green discounts and here I do not have the same earthy counters on the shelf a book added more here and there so I think so far enough passage if it is in principle and so it can work great. You have a paid version or it doesn't go straight to 220 by definition, I understand if you have a good antenna, you can work without any problems. Thank you, Rashid, I was glad to meet you at North Butovo, my warmest regards. I think we will cross at least in this period when the local transmission work, but I butovo so south hear in principle, and the northern is already there are difficulties and for the mkad, of course, I do not take it there is a dead zone. That is the situation. Thank you, Rashid, I am glad to hear you. Have a nice day with the oil week and the 70future ones as well.

Speaker1: [00:00:00] Talking about the crisis should be understood in negotiations. Tsarev they have some point of their own there but there I looked at the map there one water bodies but they mostly all who behave themselves there very well that there all schoolchildren bad but they more on these pictures they what there are in the area of Tsarev. And they call me last year I could not get away. I do not know God will give this year as it will not work. So they take me there in these places in the tsarev reception. Yes, that's the modern style of one Napoleon betrayed by Rybachuk and who's Rybachuk. It goes Ruslan I call two clubs called and someone goes the word hand there iron everything is flooded there water is already gone and there remain such ponds big tongues... However, the Russians there are +2 more and so something like this reception. Yes, not something they are not capable of. Besides, most often of course here I think I'm afraid of him but it is important how they there is a good friend of mine. That work is an elementary school teacher and her husband goes there and her husband is an avid fisherman, but there are three brothers and they are all inveterate gangsters. Well, at least to go, God willing. Maybe my grandson is also crazy about this fish. In my computer game fishing is all there go crazy. Veteran's father has a Ulyana Ulyana growing up so if anything God will give can be sure that under two sons. Elena Anna Ulyana because the problems come. I also love. There are weekends, too, we take fishing rods and baits all that stuff. All the same Ded Moroz and tents go out on Saturday weekends there are a lot of people going. But in the daytime of course I'm fishing

I don't go fishing during the day. There then years of security there in the daytime people rest. Has the Olympic already all. Rock music all the same romances. So. Out comes the boat all. In your opinion this is a brilliant answer. A. plushchev on the tip of the bell. Sergei popov universal. So. I also sometimes think to replace something like this to buy. And then think about why you need it. The real once a year in. It is possible to acquire, but it is possible.

Speaker1: [00:09:48] In the middle of promoting me to go. I say and you're coming in a piece today. Even yesterday cars with prisoners of war at least a little bit two nights more than the rest but also turned on the Arctic. Here you talk, I'm not going anywhere or shit. That's it and here we are again congratulations on the Shrovetide reception left. And then turned on the lock that is there is no one here but they are usually all above that there also begins not choir all the nagging usually no negotiators. You look up to five kilometers stretching rustle what they have all sorts of things down there and more such cases turchinov as it turned out did not make it clear to me because. That such things. The first book of Trier's three rgb. Alexei, we were talking about something yesterday, but not on the air, but over the phone, we have a very powerful poet on the computer, and there's a virtual shaman on the computer, but I talk to him on the internet, and he would give us a signal in any direction, so we were talking to him about you. At first I said he had a military one and he had a receiver with this baba and I forgot what it was called when it was made in Tambov somewhere at the sulfur electronics plant. But they didn't make many of them, maybe they made 1520 a few pieces there. And here we have a tomas area such and the beginning of a large building there.

[00:03:51] Good afternoon. Even loudly yesterday and for more

Speaker1: [00:03:55] Suppression of Hungarian I have. Twenty-two years can not live but it is not yet known to everyone so it's me yet

[00:04:10] Didn't have time to buy that land. Next thing you know, nostalgia. So if anyone hears.

Speaker1: [00:04:17] Powerful hint on this topic for example. It's an innovation on its own. There are facts like that. We'll see.

[00:04:36] We can't be driven anywhere.

Speaker1: [00:04:41] What if the situation is now heating up creating an unhealthy wage situation by region. Salaries have been trained Latin America now some more.

[00:05:06] Great concern that. Really liked our

Speaker1: [00:05:12] Post-Soviet time is a direct step backwards this. We're more professional here. It's incomprehensible. That said, none of these high school kids will ever decide to do it. I think it was forced to do it was very interesting of course. Come on, I think it's just a matter of when we're going to be on this topic but I don't want to be offended at myself for example someone else's. I do. What our alexander said willingly girls. Peter is on the other side. There is no assignment of any kind. Today I click on extraneous only one notebook and pen. I wrote down a notebook. Today is April 12 at the beach rest. And now in the canyon now go more before the future. I also wish them a snack hope for. More. How do you say not enough. Pension is good decent so it's not enough yet. Like retirement is good... I will now give myself for the account it is for the purpose of signing the papers.

[00:07:11] Okay. I to him.

Speaker1: [00:07:15] I was talking to him too. Again adore yes. And in general exist from the polar lights at night want to help a little bit by a little bit dacha. Come on.

[00:07:32] Now. It says Philharmonic Hall.

Speaker1: [00:07:38] But then right away while I wasn't getting songs yet for example a song I didn't give one comrade rubles200 he then fell to his knees there

[00:07:54] There's this very sad Speaker1: [00:08:00] Selling here

next to me. This one so to speak.

[00:08:12] Samom. And from this very house so to speak

Speaker1: [00:08:21] We do those for 200 rubles on our knees. That's not the point, and you don't have to do things like that in front of me, for example. Well yes there is of course. Here of course there was an idea too but lost because it's not ours. Like beggars.

[00:08:50] Although it's the only one

Speaker1: [00:08:53] Area who is so good. That's what's up to shit and there's real action people out there. But like this. In a word behaved well. And they're all jumped up themselves so now the train is gone there's nothing to buy now there's no point I thought nothing else at all. He always said he was Russia's best friends. I would have bought 10 of them. I say no, I do not use it. That's the way it is. There I also passed a day yesterday so I didn't want to go anywhere. I turned on the TV I didn't sleep well I was sent 12 at first they tell me soon I must be in Austria too. Time why are you doing there. Everyone is screaming. Especially no pressure. I had my blood pressure high and low. I don't know what you're talking about. That's why I take these pills all the time. And a little bit of glee, but what

I've had a headache lately. I had three leg aches in a row. I don't know what's wrong either. And why you have it kind of sit. I understand to take my mind off this Hiroshima and less zombie box not less watching for example. But further I think the president added. Yesterday came the addition 3000 if all Europe. That's all I'm saying. Putin is my president. And she started yelling at me. In short, everything works out there daughter and son-in-law have a good job, but last month she earned. You won't believe the 650 thousand in January. In short, everyone is covering these issues and I should probably go to Yerevan to continue working. Will my dad and mom go to Armenia or not? I will probably take Rockefeller and I will broadcast from there.

Speaker1: [00:11:25] Going to Yerevan. I don't understand that my relatives live in Yerevan now. No, I will rent an apartment. We will live there, she will go to work there. My daughter will probably go there to work. They had a conference there. He has a foreign company. And that's why. We'll see what life will show there. Everything is going well there, people have already left, all the firms are working there. And there won't be any work here. I'd rather take my child and granddaughter for a walk there, especially since I lived in Armenia and I know a little about it. I do not know why my father grew up in a foreign country. He practically grew up in the south of Abkhazia, he knows Abkhazian and Georgian, you know. And he is perceived by everybody there as a local person, a stranger, you know. He knows Abkhazian language ideally to his friends again he knew Georgian language when he went there, they grew up a boy. That is what I wanted to say, you know, this is such a peculiar country. I do not know what it is like, but I want to say that the Russians are not liked anywhere, understand that for example the same is Anastasia Stotskaya our special correspondent in Belarus the official speaker of the Ministry of Foreign Affairs of the Russian Federation, but the wording of the Medina we are sympathetic to the logistics of the Ukrainian delegation. It's clear that a diplomatic gesture that allows us to try to keep hope alive for these negotiations. How to explain what's going on in Ukraine is completely impossible. What are they hoping for and in parallel Zelensky's urgent statement that Russia is staying is being studied.

Speaker2: [00:00:19] I'm the same way. We have the same weather now the sky is blue plus +2 degrees the sun is shining the snow is melting at the reception yes yes.
