[01:10:52] We don't let in Ukraine today to fight. Otherwise get your head and get off your brothers. Even if there are others claim not to let them into Ukraine to fight. Otherwise there will be a shish kebab. As part of this cardboard in Ukraine are fighting professionals there is no enlistment. Dorenko, they are cardboard, but you have been brainwashed, so you are sitting there talking propaganda, and you know nothing about it anyway. I will not go to rest, buddy let's go 73 all the best for future meetings yer fucking microphone fuck russians do I russian ship russian ship go to the bargaining window I'll put you out the window and all the phone calls make you think about yourself when the fuck out and what if you want but your son is a prisoner of the fuck. Come and take away the frightened. And what can I do some of them to get away than fight with Putin fucking but the new fucking yesterday by force psychic attack rubles in Luhansk region the ball under the cover of tanks on the cruiser fucking for Ukraine did not

slaughter anyone exactly this experience of the Great Patriotic War demand 600 thousand people as left were jerks bears or was thrown away wife I came carved out would in donbass fucking they would take her mother and grandmother spent most of the signs cut all the bastards known in the village journalists and political scientists can provide medical bought a ticket their work in my opinion catch and started to the front went to where i never sat but we have such a case water reservoir that costs for little money for those i know 8 10 criminal cases stretched for a mile and a half.

[01:14:09] Most afraid of our colleagues who are facing the uefa cup playoffs sure is a nightmare for everyone why any. And although I have such a start of the stage the reservoir is the first. How many of them on the spit were there lying not lying. And when the cars fell out completely and how were released a few hours it was the Germans who were going to take the new engines like a demonstration. Everyone else malafeev and unfortunately many have forgotten. Laughing with laughter colleagues from the current caused people to be perplexed. Give us a break and respite warned then from the machines a beautiful phenomenon. How much will you drive for budget money. The task at most and this is our great deeds. If you can here. Intruders. Tank Regiment 7 yesterday there was a plane taken no more than four days showing fucking and Putin must be removed told the chairman of the counting chamber of the city to bombing intimidate the civilians live and so on. I do not know I have an order I have the coordinates every time flew out of his pocket rubles and her coordinates have been taken and got similar just for what got caught shot down the plane blew himself up and who is there 500 rubles to themselves killed him how much from the events going on here. Putin. People who are still in the mid-seventies on and got and them native speakers and forgot hosted this most like November 11 how many times nothing like that. If the president of fifa zapp blatter will fight for the high price then you can ask your questions about it as long as I think so. How do you see the tough one.

[00:00:13]

[00:00:13] With blood I'll kill it. And what's the volume load but overall I'm satisfied. The qualification is the most expensive I have. Reform I'm already on. About the republicans I already wrote about it I already. Alexander Maltsev big. McCain recalled that. Composer alexander alexandrov I already. Told my friends and acquaintances about this I already realized. We have besides the students. Civic memorial service detail but more about. Well. Я. I lived in the Crimea except in the Crimea. O. Khohols are Russians we are you end of term comes at once. Verkhovna Rada of Ukraine adopted in general. After it became clear that. We had to put it in the alley. In general broadcast the competition has long been there Russian atamans shooters along with the Russians. What is going on in Ukraine right now, this Russian is trying to do everything to understand what the Americans think the people who took this picture at the U.S. Mission to the United Nations, it is obvious that if you listen to what is going on in Germany, too, a large mass of fans, although of them the Ukrainian captain of the 2nd rank captain of the yacht and letters. Although the Spanish court and in Spain acquitted him. Literally the next day this deed in relation to his friends who are also on their own by logic this deed is a deed.

[00:12:48] Well, let's wait here while nothing's threatened yet. The spanish judge got vladimir zelensky. I think we need to keep awarding both shovels and titles of hero of Ukraine and orders awarded to general valeriy one commander of the vdv general of Ukrainian history who had nothing to do with the armed forces of the soviet union. In general. I wish to say what so the whole idea let's define by I in general because what happens in the market and after that the Minister of Foreign Affairs of Ukraine also said and said that the nato has its last chance to keep as an organization. It's just to turn Ukraine into a meaningful aid. Because about 50 tons of pure alcohol Ukraine won't be left anymore. It's understandable. It is understandable why even if we demanded aggression against the russian federation at the same time it is well known that russia is essentially the author certainly as a minister is able to provide itself at such a level as now when before the war. But nevertheless and if we also add china with whom we have quite friendly relations then in principle all is well in russia. Putin russia in general is a russia that lives by the system and the best years. After all russia then when the sanctions were as much as possible by the way the company was cut just in case and other big teams said about leaving the public except and finally what I heard is that this form should promote the development of domestic commodity producer in this case. And so how. To create a kind of. Basic. Insist on the admission. We would not need them said. However, we talked. For this man, even when I understand that and we can safely call it a kickback amount has increased markedly. Я.. But now I think the polls have shown that we do not have an answer to this question again about what kind of game it was, I said because it is a great information that the ship went down already were the Arabs and so on. But I am unfortunately today so dear Natasha and I say this is not a war capturing and seizing power. I understand now I have already spoken about it later, but I do not know. I drove a car to Russia that for a while helped the assistant commander of the air ship prisoners of war. He thought that they should show some things that I did not understand. I had to be put in a formation living not like his son and mother. What is your team now the hardest Italy to sign yet. The contract itself. The total amount of the contract was. According to Nikolai don't want when you realize that you're opening the Russian emigration then here just the main task of advice as I understand your mother said your fault.

[00:16:36] I understand when that. It looks to me like this one is going to die as soon as possible. Ah what a character trait and a hunt. Of course I respect this Malakhov in myself. I understand your mother who performs as well as works. As soon as she started the second world war when you speak each of us knows and now she herself. I do not understand why such a point of view in the relationship our neighbor who was with me is not sure how well I know the Cossack army Oleg Lashko and so on. I do not know what causes it. Of course when I came to the match my first match in Monaco my mother is not yet. Much less than. Bye. The flight from Magadan was recorded in partisan mode record fans. Bless you. 73 so far even a question answering our clients before the meeting one dima nikolaev. In dima nikolaev his reception. I am 78 years old. Dima nikolaev pavel. Dima one dima nikolaev pavel reception ivan. The sign of the young generation. Good morning. Good to hear from you. Before 9 loudly in Gorlovka Nikolai reception. Kolya good morning. Loudly also telegraph works on the frequency for example. Why can't you do anything well. Still at home a little call you away. It wasn't. How are you doing there. Over. It's all right. 1765 zero-nine is up. And there's these bastards at the door. Well, Stolypin's had enough of Tottenham, but they didn't let him go any further. If they're human, they should all be locked up. And for the sake of taking away the equipment, for example. All right, fine, and people have nothing to do. I still have a dozen unemployed. So what do you mean. Especially 9 to zero movies were much easier to work off. Not particularly wanting. From the weak come off as well as normal. Well than to do a call for an appointment. They will serve the things that will deliver for nicolas. She. Attention. Why did we change this microphone. It's like Napoleon. It's okay. Andrei, when I was watching mine. No Volodya, but I had no time to look at it. The lawmen there seem to be fine, I didn't open it any further. Probably something. I guess something is out of order. I just need to look and still there is to the reception. All right picked up an interesting light bulb if everything goes on. She's trying to make her own.

[00:44:31] Probably a trouble keeper. Inspected three. Take a good look, let's take a good look. Several our one dima one dima nikolaev pavel invites the Ukrainian army as a result of a military special operation by the Russian army already used to. But we have something special here by personas. A whole vase of abandoned base of the Ukrainian armed forces and taken out and destroyed on the spot. Equipment and ammunition left behind as they were stored. The scale of this military facility from the ground is not easy to imagine, but from the air the size is impressive up to seven hectares. There is a lot of interesting things on them. The Russian military has been working here for the fourth day, but they still do not know what else is stored at the base. We

have discovered the base of the Ukrainian Armed Forces where there are 60 pieces of automotive equipment and about forty objects. Also at the main base is a warehouse with about 10 thousand tons of ammunition on the territory near borispol armored vehicles can be sharpened at the base for further decision where to transfer it armored vehicles tanks t-72 combat reconnaissance infested vehicles bmp and self-propelled guns. They have already been checked and are being prepared for evacuation. The Russian military is surprised at the amount of abandoned Ukrainian equipment, which is an understatement. The size and quality of the armored vehicles are impressive. This is ntv, which is now being loaded onto a trailer practically new state-of-the-art equipment confirms the mechanic driver of the Russian army, Leonid. I say where to fight. Colonel Alexander Denisov has been ordered to examine and describe all the property of the base and evacuate everything that can be useful. There's a lot of work to be done. A very large amount of money and abandoned all the more it was possible to leave on this equipment and our strange this decision was not taken.

[00:46:52] The command of the armed forces of Ukraine at the same time the Russian military has another task to protect the military property from looters so that it does not shoot or explode anywhere else. Neither does the Zelensky regime, without any control, hand out weapons by the thousands to whomever they want. We have such a big one that it's not immediately clear that apart from the armored vehicles there are entire warehouses with ammunition and uniforms, even the combatants were throwing everything away. Tkachenko in his uniform left with a pile next to you documentation certificates certificates of military specialties that is information of a personal nature of specific soldiers of the Ukrainian army. Exactly what is carefully hidden and classified from outsiders but the Ukrainian army abandoned all this did not even try to destroy if not take out. There is a whole residential camp near the base with hundreds and hundreds of tents set up. But three hundred meters away and practically every tent has abandoned things, mainly uniforms. There was an impression that firstly they left in a hurry and secondly they changed into civilian clothes. Probably in order not to fight. Judging by the preserved signs it is the 241st shooting range of the Marine Corps, where the military skill. Judging by the collected on the abandoned uniforms, sappers, tankers, artillerymen even fighters of Special Forces of the Ukrainian army defended it. The memo to participants of the Russian-Ukrainian war liza 74 was lying on the ground, but the fighters could not miss it. Unauthorized abandonment of the battlefield and refusal to use weapons in combat criminal responsibility from 5 to 10 years, but was not frightened of responsibility. The base did not even try to defend it, they just abandoned it and fled. And here in the abandoned Ukrainian military base ammunition boxes stand in rows along the walls. Here mortar shells rocket shells tank shells smash machine guns and ammunition.

[00:49:09] Approximately 4,500 tons. It would take about 450 Kamaz trucks to remove all this ammunition. But the main thing is that these shells and cartridges won't kill anyone else. anton stepanenko valeriy vinokurov izvestiya and the southern section of the military special operation ukraine. Я. This is very important for. Plane attention. I even. A very, very difficult problem. As for the second pitch. It's not so bad because. What. I still remember it though. On justice. About everything. Yeah and no problems. Dealing with financial problems. So let's all go in order. In Europe, he has very little that he has in every country. Of course, human rights in united latvia is

under the law. And I ulyana reading reported kobolev. To all who heard this eyewitness polischuk boris at the reception. There is an article by William the human another one for all the reception. [00:00:00] There's at least fifty hundred links to order. I don't know what to do at the reception. I used to order Stavropol too, but last time I ordered in the suburbs. Created more than a thousand lies now is not very active people learn that they do not need it here myself have a couple of boxes of these. Paper format a4. The village lies. And do not need and sorry to throw away. Here can move. This is a personal matter. I do not know can sometimes print once he so much but I know I do not think I was going to hang on the wall to act for example. So here I also have such a long think, but to order these are now a lot of money and will be like you lie dead weight. And I think that already in spite of age many already receive and satisfies completely. Moreover, I have in my connection go to diplomas for all these lots it is confirmed on these links he needs a paper but print and the hell with it let it not hang on the wall will not but if for such needs on the answer well yes yes of course. That's when else. Let's take the second category to

get from the Murmansk region we had conditionally. Pussy perform. Well, how do you start to send then studied not yet independently was under parental care. You start to send it, you wait for it to come. And now everyone understands it was much easier to send a cat for free. There conveyor belt has long received everything and completed the diploma, but then still wait when it comes. That's all in the past of course.

[00:02:16] So the links don't need diplomas and absolutely not interested. That's the goal that's the most effective. On tv for some reason the viewers won't look at me, they say not required. Paper supporting documents then for some reason, then the confirming paper requested. And here in general now began chucharda. If something is deleted in the form blocked. Well now unblocked already in the city court and Nikolai himself. I see Fedor, I did not go to my page on Georgy for a long time will have to at least put. In general, I have begun to treat these pindos with great warning, especially lately. Khrushchev banned them when ours did. We had computers and loaf began to buy and bianchi and all that. They gave us technology, but they say we can buy what we have already paid off 10 years in advance. Glad to hear good health little you climbed lower this very thing. I did not try to go for it, so there are no more questions, and good luck. I understand why it is necessary that the aerial at least a little bit hit in the telegraph and why the triangle has turned out at all. The 700 on this band will probably be removed, I'm already disappointed in the city. It is impossible to work on these bands, especially when the drummer taps the telegraph rb looked I can hear well everywhere and the pindos can hear. I have to tell my own. Grid send not the same will not answer your goals but also the goal do not forget what you listened to yesterday on the walk.

[00:04:47] One turns out to have worked but russia but russia is on the hands. Well in general unpleasant. All the best peter goodbye until we meet the russians. I understand fedor but be above it all does not want. Too bad you can't translate it verbatim. Mac was not born, or this hunger was not there. We did without you in Soviet times, there was a ban. So what the hell with them, those who have no brains will work. Pro. All right, let's hear you bye bye. All the best. Please to all the radio anna christiana nikolai. And our antenna is not designed for such conditions. I hope it can be fixed. Goodbye to your children of Moscow. The authors of the film. 6. And them. Good morning. Very well taken blue sky blue wind announcing about his most taken prisoners asked to take home while not heated 19 20 years to take the example that took 22 tankers worked out here did not eat or drink a whore. Glory to Ukraine slowly from this series of ships after relaxing because they abandoned everything even the military not so the plane fell down draw up documents that I do not even know 30 million dollars the plane. Yesterday arseniy yatsenyuk announced the anti-aircraft defense of mariupol. Two helicopters with a helicopter we were told there are four of them. Marines declare a helicopter falls and so on and so forth. And if Putin is in charge I if there are children grandchildren don't throw to Ukraine.

[00:40:47] I know shreds. And dima 7 0 8 5 9 9 simferopol reception was regiment this sebastopol was once I don't know who there we were exactly observed. That is, we came here after two deepening raised his hand raised to give for kopecks to sell for kopecks the same way as the Donbass shouted glory to Novorossy Little Russia fucking and now they do not know what to do next. Ukrainian money does not have enough Russian money. In Moscow, they cannot even provide a single currency, not even the fact that people are coming out of the factories, there are strikes in Tatarstan, another city in the factory people have not paid their salaries, and some have even paid foreign bikers to the dollar exchange rate. At least they paid the lawyers for the deceased in Ukraine will give mothers 11 thousand rubles. If the court ruled to pay 100 dollars of which died zibrov we understand that this is the fucking price of life in Russia, the price of a person's life by the dollar. He was caught and he'll probably still get less than 100 dollars the price of a man who came to the civilian population of 100 dollars and I'll kill him. The price of a man's life in Russia is 100 dollars. But we are going to beat the Nazis slowly,

we are going to beat them slowly. And already the first swallows have already flown to you and not new ones appear the cry of the soul of the population of Ukraine attacked you fucking thank you for what russia for whom the boys are dying and together.

[00:43:42] Sobchak spoke lady in Moscow in the Kremlin says that the security forces sent the conscripts for them. They agree to enter the territory of another country 100 people out of which only 4 take Makarov left her doctor from which is the regiment. Good morning to you 5 10 15 years reception. We just need to check her on the appointment what the minister missed. Please please approach. There was a regiment went to the board was a lot of mind did not need that fedor somewhere in 8 points mikhail took to the reception on mikhail zadornov. I do not have such big ones did not send their grandchildren and sons here. Otherwise, bang would come you fried kebabs and she would come. Here I can just say right away, do not call your grandchildren and children do not call here. Otherwise you will be for the Russian ship fuck the glory to Ukraine heroes glory. This I do not want. Let's deal with it. This is not bullshit, this is war. A war declared to Ukraine by the aggressor aggressor. Against the fascist Putin putler hooligan on the background of fascists putler did not press on the man christ throw milk at the sight of nothing but their leaflets sell. Show me. I say to Ukraine heroes glory. I beg you, I beg you, do not call here if you do not want to mourn your relatives and sons and send your grandchildren here and do not come here yourself, it will be bad and very very bad. Don't you want some kind of unhealthy what night will tear apart Kharkiv and Kharkiv was Kharkiv will stand up to what your Kharkiv will disappear and is already surrounded by all that everyone there in 2004 already shouted the fucking case Zhirinovsky this faggot of the Kremlin fuck.

[00:46:43] No everything will be shut down soon all the channels shouted everything took all the Ukrainians in themselves all the guys introducing kiev introducing kiev is already going on ten days war ten days war is going on bombing and missiles arsenals and even fucking bombs aircraft what the fuck does and your Russian army is approaching it constantly present over 10 thousand people lie here where the fuck already go where the entrenchment or the equipment that is left is dumping the fuck where they entrench themselves. Come on. So what the fuck to do about it. We should get together in Moscow, that's the best. I'll tell you what. So let's all have a good day, guys. 73 bye for the lawbreakers would be good. I've got nothing to eat like squirrels, but it won't save him. In Kharkov today and ran by car to the north of the gas sector. No way is a significant at least a small minus. Then the water she has at least below can keep the water hot we were promised like 2 4 I looked at two shelves yes yes no about zero somewhere minus how many minutes I looked 07 was somewhere about a degree for example minus one. You can't see the circular electronics like that there in the middle of the city still need to get yourself a normal electronic thermometer and forget about it.

[00:49:10] Well yes you can come to that hard. So okay still come up a little later too well expected when you stay right now a second. Did you actually go to the market today or what I understand. Yeah I managed to laugh I wanted to give him a job, but okay. Come on, let's spend a couple more hours with this faggot from the country and he kind of calmed down. He was the only one who was affected by the press. He did not seem to be tired. He talked to a clever man and to someone who would go there, but there would be no option for him. There is such a

breed. So let's go there or whether it goes away or as right now Misha Galina in one of the days of the war has not seen a real war. Well, at most three days from Ukraine in the ruins. But he does not understand this, and he does not understand what kind of three days there is probably nothing left alive. They just understand their asses like they have been licking it for eight years when they gave it to Donetsk. In short, it would not hurt to give it to them properly and it's probably not for nothing that Kadyrov said to give it to me, I will take Kharkiv and Kiev for a while within three days. It is obvious that the goal is to remove this Bandera show people banned. That is why the casualties on our side such losses including by all the rules of warfare. This I say. Maximum of what used to be able to flatten the ground for example.

[00:51:41] For that with the condition on the side guys from all these crevices where they're hiding out there. That's why they're taking it this way so that the civilians and this very one don't get destroyed. That's why they are happy to try. But what can we do, our Russian humanity for a while. The judicial system does not talk. What have you found the theme of not talking on the air all over the world, and what's the big deal if you hear and see a million times more on television and on the Internet than we say a few words here. Although what we say does not change anything and they are much smarter than us, their minds may be completely different. Okay, Vladimir Ivanovich. Yes, I see. Well, let's call more of them then. Maybe our Crimean guys will come to the radio Dima 7 people Sergei invites to 80 meters for all articles and records. Sergey for all free to receive in the market to love or not love dearer. [00:00:00] Works. What's the point of racing on electricity itself like it's heating on the balloon. Well it's clear of course there's a furnace running, even though it's heating right away this guys are so off with it. Such a boiler is the reviewer of the garden tank goes and it heats up perfectly there and heating. And this one as they say titanium are warming up at the reception. Yes yes yes yes Vasily so Sasha is here now he will tell us what the mic is doing there for you. Good morning. I haven't said hello to anyone. I want to tell tales from the class, so the spring has already awakened for a while. Well, how are the puddles frozen, for example. Well, some are a little shiny around zero or something. I see. So it's okay. Let's hope you start cheering for the class. Yeah. The thing is, after you left, no one else came up. Vovochka's asleep. So here's the thing. I've got about 20 in the port at the base, and I looked it up in the morning. Well, I think the cable's thick, so they don't rip it off. You see, you've got this very thing for starlings. Don't fight it, they're small. Vladimir Vladimirovich, I understand that a little water is different. I'm nice to see. The parasites have found a place for themselves and the main thing is that at the very top, you know where it goes one way and the other way. And here they sit as specially planted at the reception. Well, yes, we need to take a picture. I do not have a camera. It is necessary to tell my guys so that such a case is good. But let's call them. Everyone on 80 radio any 7 kilowatt ulyana invites to the Crimea radio luba 7 kilowatt ulyana all 80 meters reception.

[00:02:41] What anatoliy vasilyevich malakhov had sat down. How they jumped bolts thundered. The helicopter went down for example. You what the story is absolutely true yes it is clear I

agree with you. Of course I do, when I have done all this, it is time for the Finns to send in the troops, and I do not have Muscovites. In the summer it is not terrible. So it is time for the Finns to pour it all in and the cable and these bolts on the receiving end of the plasticine is not bad either. But it's true Misha. Kovalenko complained while I was working there in Bulgaria. Romanov was caught come. The shit from the stove ate that plasticine for a while. Well, it's possible. You know, I only had a radio when I was working at the ratification station. You guys used to get these jokes all the time. The radio was going all the time from the boob or asked but I didn't know of course I'm good. But I don't swear, all the time I was told by the guys that there's a kind of plasticine. But of course I'm not going to play the poles all the time but just and all on the reception. That's right. Me too. True I have a clogged antenna those same bolts all this nonsense. But nevertheless it is kind of down cleaned but all shiny in place have decided not to go there any more. Of course, everything is correct there. But I'm used to it. You know, it's been about 50 years since the guys gave me what kind of connection I had. A battery of 50 meters of cable that's so blue our soviet one took off.

[00:04:47] Back then there were radio stations at radio hubs. And you know the radio stations took that cable off and put a new one on and I had the guys for a bottle leave it all behind as they say. And so you know since then works only for reception but still will not work. Cursed all the dimensions. True, everything was Soviet, but it was more reliable and reliable. Once maniak petrovich alekseyev were they on the measure just says laughter this very north imported failed. I think it's 19 or 20 degrees and you are 134. No knobs nothing to see when they were waiting for helicopters. Then they sent Anatoli Vassilievich down to the bottom of his heart. Apparently the altitude lacked oxygen and then a helicopter came for them and 30 40 degrees and it works no problem for example. That's right that's absolutely right I don't believe it because that's how it really was, it was iron equipment really was already done so it's like they say drop it up it's working on the reception. That's right, like a Soviet tank our microphone. That's listening to you read yes yes yes yes yes there is such a thing. I don't know, there was a box on top of it. And then there was something there and it was seen too found and the box fell apart now without a box well, I do not know how it will have to replace it. Such a thing for a while. Well well anyway Sasha is doing a great job now with a friend I also have a friend to do an attack we lightning well worked so that such a thing at the reception. Yeah I've got the tricky ones.

[00:07:08] It's very cunningly done so it's like that. Well I see. Well everyone does it their own way as it turns out at the reception they adjusted it to the local conditions. Didn't understand at the meeting what I said their god yes. Once again. Backpack what a tricky bottle heats up. No, I'm not tricky it's thick, it goes first like an inventory and then one end goes vertically down and then it's a little slanted. Well, to fit in the length I've got what's like two meters here, but it's gone up. I'm kidding, but what to do with our plots with our areas. It's not like there and to the old square what do you want to build in our conditions do not work. Okay, let's ask. He probably would have said hello Bond garden Anatoly Sashka that my countryman here is not going to get anywhere anyway something similar to him at the reception. I see, one gang, what to do with you. It's all right, no problem. Alright Alexeyevich was given but it's good that all this scattered further no one all sleep without radio luba 7 kilowatt ulyana everyone to 80 radio luba 7 kilowatt ulyana and a group of stations reception. I have a jump on the novel. Sergey answers. Once

again. Ulyanov roman stroyka beetle central sergei excellent thanks then listened to it good morning thank you 5 9 10 loud good to hear. Vasily Kormovoy village 40 kilometers from the Evpatoria to the north on the reception received good morning loudly receive you here plus 25 danced great station. My name is anatoly.

[00:09:41] I'm near Kirovograd dacha area on the reception. Anatoliy accepted about beautiful beautifully accepted loudly too hear well and listen to anatoliy's band. The actress is doing well and back ulyana. Good morning namesake 5 9. Anatoly simferopol the brand of this site is great take 32 points very loud then tell me what I have very bad want to do a triangle. At a height of 4.5 meters in the garden. This is the kind of score I have at the reception holds this. A wonderful person who is not and no questions. Happy Holidays to you women and to Sasha the microphone. Well, I understand that Anton asked internet investor for %40. And so three cents. Sergey Ulyana of ours. Anatoly good morning. This is 9 25 may alexander from simferopol for example. Alexander simferopol good morning. Very very loud from 35 to a special frenzy in my place. Anatoly I am near Kirovograd on the dacha site for example yes natalya yes no problem great. So it seems like everyone is lying and there is no one else and Vasily at the microphone thank you cut off the center sergey lubashenko anatoly anatoly thank you. But it's still very good for us today, our woman of 80 is hand in hand and it works very well. Anatoly, what power do you have for example. Can I now kilowatt two buildings exactly kilowatt. Of course the position is good. And you understand me well now I understand so I want to do and I know what radical parking no one does you guys at the reception no I did not I then have my own thing on the mazurka and on the second video. So I'm the one that shot the triangle and I got the 18 meter mast.

[00:12:19] I got that in. I'm working the trampoline right now. I got a world war triangle. South rade for example 25 meters it has there means the mass and it's directly connected to the mass in the center. I do not know because I read there even spent some time doing something. Some guys advised well how to whom and how. Who can do what. Thanks guys for the group. I would be glad to hear from you all earlier do not regret it. One more thing. Thank you cut off the radio and any assessment, but Mother is Europe. Anatoly, thank you. Thank you. There will be no questions except to thank you for your woman with a holiday. We have found good health and longevity. I'm on the radio sitting in the center of sergey radio lubashenko band goodbye. Goodbye to goodbye to the center. Do you know how I guessed. I'd go back later, too. Yes yes yes. So doubts about the purity of the 15:10 on the transmissions are listening to everything in moscow. Anatoly I am overboard because my brain is showing me such things now I am radio at all. Please Vasily. Anatoly my call sign 4 center yelena anton petya and volodya also left. Sing go go go go please. Count the spoons. Make sure it's not disassembled on the knife or they'll ask for more. Mom's also warm 73 is already 4. The center drinks Kharitonov. Radio 4 Center Elena Anna so and Nikolai came. Yes inaccurate after a shot of let me listen to you at the reception. Series center elena antonova in the hotel plus I hear nikolai antonov also disagree with the proposal that I yaroslavl also plus five.

[00:15:21] Such a fun wind yugo fuck but no as long as I have antennas stand seems to be alive. It's true the wind is strong from plus 15 I'm receiving +15 kol so it's ok for now what on the

spot then I'm afraid to work. But I also have an alarm and now the wind is probably 8 degrees below freezing, and the fuck with this as well as from the top below everything froze up and yesterday it was raining. Then watched the freezing rain and turned into laughter, it snowed all day long. This is the kind of weather we have at the reception at my place for 70 years. Yes nikolai depression 73 health good luck childhood. I'll go now. So how much more 8 8 8. It's still possible to go to serve and to whom to tell it let's ring. And. I know this district vladimir balakovo will have to have a number of meetings. Could do it still replacement at the neighbor's 12 points but the problem was solved this morning in the head. In his version on the account of which Siberia was Komsomolskaya Pravda. And they forgot about theirs and then regretted it. No we also have for me three amateurs but also one. In the first half. How to do it. Really after attach how. This is the same 73 bye. Interview bye. Roman Antonov 4 center olga winter. Who hears sang. Very weak. Somewhere 5 5 5 6. There will not be a round table. That. All right, all right, so I'll sit and wait. We'll let someone else know. Guys, let's go smoke. Roman Antonov to the center of Olga Dima I got it all. Rodionova 4 center.

[00:19:46] Ulyana. Radio and the center of its influence. Loud 59 23 m accepted. Good morning 5 9 7 9 10 20 27 milk vladimir for example. Yes volodya accepted. Andrey mihailovka all clear beautifully loud. Heard Volodya there will be no round table. Yes, a lot of people are flying. I well 73 bye bye to them. 73 bye bye. Yanukovych is like Christ, a fairy tale. We are the center of what charitons. Here 4 center olga from rome sure 5 9 plus 15 hear andrey mikhailov spear to andrey. We have our whole nine 15 somewhere 10 15 lysakov still Anton is working mostly full refusal. Yes it is customary to show a little bit 5 15 so here and there all right. 4. Arrival Kharitonov 4 center. Thank you for answering. Well I'll go then I'll go too. They are now and so on. Goodbye. Hi andryukha, nothing to say. It's OK. Go away, or I'll punch you in the ear. Mayakovsky. Kiselev 20 for 20 25 is great. The center of Ivan Nikolayevich is quite loud. Good morning also for 20 excellent quality all right goes boss volodya azarov over the card son reception. I am an adult in 20 25 years like children. What are you, Volodya? Where's your neighbor, you can drink tea, you can drink tea anymore. If you can't, for example. I got it, I got it. I heard that Alexei will not have an antenna there, so let's go turn on the kettle. Now as somewhere in the song for example. Who. Like a guitar song lyrics I sang not the one that gave birth to me it's ok to sing when I have to go home or even later.

[00:22:57] But I haven't heard it myself. It's more like I'm listening to that kind of stuff. Yes yes Volodya I have it on and here I'm going to put the kettle on. Them. 4 managed to greet 100 years with his A-plus Sergei in Kalinin reception. Sergei good morning glad to hear you. Glad to really long time we have not met on this range. Here I have a rower 30 40 hooked up passing very good very good. I had my ukv out yesterday and my antenna went down and ripped and the vertical came crashing down at night. Nightmare nightmare. So I was in mourning all day, but let's all make some this evening go to the roof as you are doing. Seryozha, for example. Or else. It's alright, they're doing fine, but I've got an aerial yesterday, I haven't gone out yet. In Saratov, they say there was Mila Kadyrov. What has he done. You know, the hurricane. I went out on the roof of a 16-storey building, but it is impossible to literally knock down what antennas there. How can they withstand that kind of pressure. Moreover, for more than twenty-four hours now the second day went the wind does not calm down at all. Well, we live by the rules of the

antennas. Serezha was to hear you will not be delayed all they wanted to put wishing you good health. And of course, bon appetit. 73 Sergei Voloshin of the round table in the cafeteria at Alexei Tolstoy's coffee, the antenna is broken. Let's not say goodbye until we meet again. Yes, of course, have a nice day. 4 months 4 zika 4 zika. Good morning.

[00:25:14] Well loud and loud sleep. Vladimir Saratov, near Polytechnic. Good morning. At 9:30 something is rattling for you too. Sergey if on the frequency good morning we wanted to stop the tea on this volodya abandoned alexey in Saratov factory district. Yes, Alexei, it's fine, it's also +30, but there's probably 10 kilometers between us, no problem. Yeah, I heard there's no roundtable today and my antenna's broken. Alexei also said the antenna broke in a hurricane like this, you can wait for example. Of course I couldn't take it all while I was out on the road. I have a private sector in the content itself. So that on the vertical that in a tube of whitewashing oversight of the new breed will endure. Now there is already a mother for me it is heavy costs a 16 m tank and the antenna that in one side that in another. It is normal to go well. There, I do not know Sergei here Sergei that something will pass. He probably went to put the kettle, and my antenna was one of the elements 4 meters of its metal. In the end broke the actual support mast wooden. And knocked down and broke in half on the roof. Such things. Well and versions of me, too, had a lot of range. Same thing from the heavy torn off and its stepped with the wheel and can't be put down. Climbed on the roof there's a house all covered not argentine not a sneak and not take off such problems. Thank you for this morning's broadcast. I wish you good health, all the best, but I wish the antennas to stay upright and not to fall down, so we can work anytime. Let's go for now. Yes.

[00:27:25] Well it's not like that in the ice, it's not going to be dangerous, especially on a five-story building that's enough of a floor to fall down. I reported it to the emergency department. So the weather is still in. And then everything will be done. The main thing is that it was good. Glad to hear too, I do not hear how you heard you on my not turned on, so it is such a gap period. We wish you all the best health, good weather and prosperity. 444 for meeting you. Thank you. Thank you Aleksey for the wish. Once again, my best wishes to 73. 4 kilowatt center. 4 center question business center rkts. Kirov center 4 center good morning 5 9 plus 10. Here vladimir saratov near polytechnic reception penza. This 9 takes 9 plus 10 also somewhere was going. No. My name is Farid, and Farid Pugachev has arrived in the city of Pugachev. Well not bad I have to say I take your option 5 9 plus 10 15. Noise is true, but still, now everything is sorted out with no problems whatsoever. We are having a discussion about the hurricane. I'm telling you, half of my antennas are down and half are broken. What a nightmare. What about the weather? Six months. I look at it now, it feels like 17 years. But I used to go out the window and look at the antenna. And it's 20 meters high by 4 heavy losses so powerful heavy and concrete blocks spread out along the foundation antenna and I didn't regret six months.

[00:30:06] Well a radio is a radio well. Heavy and two tier bridge 20 meters all standing fine. Yeah well that's good well done you made such sturdy in part. You fixed them like an anchor to these blocks. But I did not count on such a hurricane that we had yesterday and today continues. So my construction didn't hold up, it broke off hard and everything flew off the crew, it broke in half and it fell down. She didn't have to go through the whole thing. As soon as the

weather gets back to normal, we'll fly to the roof again and repair it. Well thank you Farid for this morning's test. We wish her good health and good weather in spite of everything. 4. Kivalova center sergey 473 farid brewer center. You know, I had one triangle, you know, one way triangle. You know, 80 meters and more 84 85 on it formed. 5 centimeters stepped and she is now lying in my driveway in the masses of 10 October guys came to my sessions helped me put under a meter army wanted to put started dragging 40 meters. Holy shit. Had to bring me so I had to put but nothing to work fine. All good 73 days when it goes like this, of course it is difficult to hold the construction. It's so heavy. And our antennas are not designed for such conditions. I hope it can be fixed. Goodbye to your children from Moscow. 6. And they receive us very well. Sunny blue skies wind north and big.
